definition and delimitation of self and other for example cases in which identities may be disputed changing blurred peripheral or imposed Such a focus on complex contexts allows clearer insight into the identity making and marking functions of language The collection approaches these topics from a range of perspectives with contributions from sociolinguists sociophoneticians linguistic anthropologists clinical linguists and forensic linguists

Language Myths and the History of English Richard J. Watts, 2011-02-01 Language Myths and the History of English aims to deconstruct the myths that are traditionally reproduced as factual accounts of the historical development of English Using concepts and interpretive sensibilities developed in the field of sociolinguistics over the past 40 years Richard J Watts unearths these myths and exposes their ideological roots His goal is not to construct an alternative discourse but to offer alternative readings of the historical data Watts raises the question of what we mean by a linguistic ideology and whether any discourse a hegemonic discourse an alternative discourse or even a deconstructive discourse can ever be free of it The book argues that a naturalized discourse is always built on a foundation of myths which are all too easily taken as true accounts
