*Transportation Sensors and Controls Society of Photo-optical Instrumentation Engineers, 1997* *Demonstration of Video-based Technology for Automation of Traffic Data Collection* Michael C. Pietrzyk, 1996 Implementing Congestion Charges, 2010 Recent advances in the scientific understanding of urban traffic congestion have only strengthened the already solid case for congestion charges as an element of a successful urban transport policy but examples of real world congestion charging systems remain few and far between What can be done to improve the chances of their more widespread adoption in practice This report draws lessons from attempts to introduce congestion charges Technology is not an obstacle and technologies should serve policy purposes instead of define them Charging systems are not cheap and thus should only be used where congestion is severe Public acceptance is seen to be the key to successful implementation Although environmental benefits and careful deployment of toll revenues may improve acceptance a charging system should never lose sight of its principal aim which is to reduce congestion Publisher's description

**Video Enforcement for HOV Lanes** Shawn Turner, 1998 This report documents a study conducted to assess and test promising technologies for HOV lane enforcement After a qualitative assessment of video automatic vehicle identification and infrared machine vision technologies the study was suspended because no preferred infrared technology was available for testing The study was resumed when a vendor demonstrated promising video technology The high occupancy vehicle enforcement and review HOVER system was then developed for an operational test on the East R L Thornton I 30 contraflow HOV lane in Dallas Texas The results of the operational test indicated that the HOVER system in its current state could support a program that mails HOV information to suspected violators similar to the HERO program The study's limited budget prevented several improvements that could improve the capabilities of the HOVER system With several enhancements to the system e.g. improved license plate recognition and whitelist license plate database etc the HOVER system could be used to perform enforcement screening Significant enhancements to the system e.g. high quality video cameras and additional camera views improved video signal transmission improved license plate capture and recognition etc could enable its use for HOV ticket by mail programs although enabling legislation does not currently exist in Texas The author recommends implementation of these enhancements and further testing to determine future system potential
