The Grendel Project Brent Kitching, 2009-03-17 Most people live with the assumption that man is the high point of life on Earth Our technologies and ingenious inventions give further credibility to what seems so self evident Yet there is a dark side to our progress We are exploiting the planet and it is inevitable that many resources will run out Could man evolve differently Is there a higher being in each of us that needs to be honored Can we only do this by cultivating a different part of our mind Journey along with Professor Eric Parker as he encounters a revolutionary discovery the missing link and weaves a new meaning to the age old question of what it means to be fully human Will Parker be able to escape the death threats of fundamentalist zealots Will he be able to save this recently discovered species from extinction fabricated by those who reject the idea of evolution in favor of special creation Will Parker find a way to make his life a more sacred experience See how one person's search for meaning can survive in a world of conventional answers
