## **Advanced Transport Systems Analysis Modeling And Evaluation Of Performances:**

Advanced Transport Systems Milan Janić, 2014-01-11 This book provides a systematic analysis modeling and evaluation of the performance of advanced transport systems. It offers an innovative approach by presenting a multidimensional examination of the performance of advanced transport systems and transport modes useful for both theoretical and practical purposes. Advanced transport systems for the twenty-first century are characterized by the superiority of one or several of their infrastructural, technical, technological, operational, economic, environmental, social, and policy performances as compared to their conventional counterparts. The advanced transport systems considered include Bus Rapid Transit (BRT) and Personal Rapid Transit (PRT) systems in urban areas; electric and fuel cell passenger cars; high-speed tilting trains; High-Speed Rail (HSR); TransRapid; Maglev; TRM; Evacuated Tube Transport system (ETT); advanced commercial subsonic and Supersonic Transport Aircraft (STA) conventionally and Liquid Hydrogen (LH2) fuelled commercial air transportation; advanced Air Traffic Control (ATC) technologies and procedures for increasing the airport runway capacity; Underground Freight Transport (UFT) systems in urban areas; Long Intermodal Freight Trains (LIFTs); road mega-trucks; large advanced container ships; and freight cargo aircraft and advanced freight goods collection distribution networks. This book is intended for postgraduates, researchers, professionals, and policy makers working in the transport industry.

Transport Systems Milan Janic, 2017-03-27 The transport sector consists of different modes of transport, each serving a growing demand for transporting people and goods. This growing demand, on the one hand, needs expanding the systems capacity, and on the other hand, increasing the corresponding economic efficiency, effectiveness, and environmental and social friendliness. This implies development of a greener, i.e., a more sustainable transport sector. The book describes the current and prospective state of the art, analytical modelling, conceptual planning, and multi-criteria evaluation of the selected cases of transport systems operated by different transport modes such as road, rail, sea, air, and intermodal. As such, the book is unique in addressing these three important aspects of dealing with transport systems before implementation of their particular components means by the selected cases. It will be particularly useful for readers from the academia and the professionals from the transport sector.

Maritime Supply Chains Thierry Vanelslander, Christa Sys, 2020-03-24 Maritime Supply Chains breaks the maritime chain into components, consistently relating them to the overall integrated supply chain. The book not only analyzes and provides solutions to frequently encountered problems and key operational issues; it also applies cutting-edge scientific techniques on the maritime supply chain. Sections consider shipping ports and terminals, hinterland, and the issues that intersect different parts of the chain. Readers will find discussions of the various actors at play and how they relate to the overall function of the supply chain. Finally, the book offers solutions to the most pressing problems, thus providing a unique, well-balanced account. Provides a comprehensive and integrative account of the maritime supply chain from shipping to port to hinterland. Cuts through the maritime supply chain to offer a transversal picture on how the chain functions. Applies rigorous analytical

techniques to give solutions to the most frequent and pressing challenges facing maritime supply chains Considers advances such as blockchain that are set to transform maritime supply chains **Marine Research** ,1969 **Marine Research, Fiscal Year 1968** National Council on Marine Resources and Engineering Development (U.S.),1969 Scientific and Technical Aerospace Reports ,1980 *Report of the Woods Hole Conference on Maritime Research and Development* ,1970
