concept at a time. This allows you to better understand how and why something works since you aren't presented with a lot of irrelevant code and you can better see the bits and pieces that come together that make something work. While these examples may not be particularly pretty they are extremely valuable learning tools that will help you master cascading style sheets. To enhance the learning experience most of the source code examples are presented in syntax colored code a special feature in this book. Syntax coloring is a feature that you commonly see in fancy development software such as Zend Studio used to develop PHP or Microsoft's Visual Studio used to develop ASP C and so on and other software used by professional programmers every day. Syntax coloring is used in these software suites to make programming easier and more intuitive and it offers tremendous benefits in teaching as well. It allows you to see what the different bits and pieces are in source code since each of the different bits and pieces has a different color.
