[Ballistic Trauma](#) Peter F. Mahoney,James Ryan,Adam J. Brooks,C. William Schwab,2005-12-27 Ballistic Trauma A Practical Guide provides a concise guide to the clinical and operational issues surrounding the management of the ballistic casualty The book crystallizes the knowledge and experience accrued by those dealing with ballistic trauma on a regular basis and extends this to those who have to manage these patients on an occasional basis only This book is aimed at all medical and paramedical personnel involved in the care of patients with ballistic injury It will be especially relevant for consultants and senior trainees in surgery anesthesia and emergency medicine who are likely to be involved in the management of these unique injuries It will be an essential reference for pre hospital care providers and nurses working in the emergency room and intensive care Military surgeons and medical and nursing staff on deployment in regions of conflict will find the book a valuable resource

[Advances in Medical Education](#) A.J.J.A. Scherpbier,Cees P.M. van der Vleuten,J.J. Rethans,A.F.W. van der Steeg,2012-12-06 About 550 registrants from 51 different countries attended the Seventh Ottawa Conference on Medical Education and Assessment in Maastricht We received 525 abstracts for the conference divided in thematic poster sessions and platform presentations Organising the conference was an honour and we tried to meet the high standards of a friendly and relaxed atmosphere which has characterized previous Ottawa conferences During and after the conference about 250 papers were submitted for publication in the conference proceedings leaving us little time for a post conference depression Despite the large number of papers the editors have attempted to review and edit the papers as care fully as possible Occasionally however

correspondence exceeded reasonable deadlines preventing careful editing of a small number of the papers. Although we felt that our editorial task was not quite finished we nevertheless decided to include these papers. We thank the many authors for their enthusiastic and prompt response to occasionally tedious editorial suggestions and requests. We are sure that this collective effort has resulted in a book that will make an important contribution to the field of medical education. The editors want to thank Jocelyn Flippo Berger whose expertise with desk top publishing and perseverance was a great help.

**Cumulated Index Medicus**, 1994     **Practical Health Care Simulations** Gary E. Loyd, Carol L. Lake, Ruth B. Greenberg, 2004. Here is the first book to respond to the growing movement towards clinical simulations in health care education. It provides all of the guidance needed to make an informed decision about whether to begin using patient simulators. Describes how to develop and operate a simulation center and discusses how to design educational and assessment simulations that reflect specific educational curricula. Features the expertise of three authorities who have extensive experience in working with the University of Louisville School of Medicine's Dr. John M. and Dorothy Paris Simulation Center, one of the leading medical simulation centers in the world. Explains the value of simulation for a variety of healthcare disciplines and discusses which types of simulations are most relevant for each field. Discusses the resources, space, personnel, equipment needed to establish a simulation program. Evaluates the specific simulation products that are currently available. Details the nuts and bolts of preparing relevant patients and scenarios. Describes applications for assessment, certification and re-certification. Presents an overview of future trends in simulation such as virtual reality simulations and discusses issues related to planning for simulation center growth. With 29 additional contributors.

**PHTLS**, 2004-08. Prehospital Trauma Life Support PHTLS 5th Edition Military Version is a unique continuing education program that directly addresses trauma issues in the prehospital environment. Following the publication cycle of ATLS Advanced Trauma Life Support by the Committee on Trauma of the American College of Surgeons the PHTLS program is designed to enhance and increase knowledge and skill in delivering trauma care. The PHTLS textbook is the required book for the PHTLS course and is also ideal for use as the trauma component of a paramedic course or as a general reference book on trauma assessment and management. Based on Prehospital Trauma Life Support PHTLS 5th Edition this military version combines both basic and advanced trauma concepts and skills in one definitive resource and features an entirely new chapter on evidence based guidelines for military medicine developed by the Committee on Tactical Combat Casualty Care. Instructor resources available contact your sales representative for details. A companion CD ROM with video presentations of the airway and spinal skills used in PHTLS is now included with every book. It also contains information to download onto a PDA such as the Glasgow Coma Scale Revised Trauma Score Rule of 9's Parkland Formula and Pediatric Vital Signs. Content includes both basic and advanced training and has been updated to reflect the current ATLS guidelines complete with extensive references and suggested readings. A consistent approach for every body region makes the book easy to follow and includes content on
