Malliaris, Leslie Shaw, Hersh Shefrin, 2016-09-06 In The Global Financial Crisis contributors argue that the complexity of the Global Financial Crisis challenges researchers to offer more comprehensive explanations by extending the scope and range of their traditional investigations To achieve this the volume views the financial crisis simultaneously through three different lenses economic psychological and social values Contributors offer a constructive methodology suitable for exploring financial crises They recognize how current economic analysis did not prepare academic economists business economists traders and regulators to anticipate economic and financial crises So they search more extensively within the broader discipline of economics for ideas related to crises but neglected perhaps because they were not mathematically rigorous They affirm that the complexity of financial crises necessitates complementary research Thus to put the focal purpose of this book differently they explore the Global Financial Crisis from three interconnected frameworks the standards of orthodox economic analysis Minskian economics and the role of ideas and values in economics Values are the subject of both philosophy and psychology and can contribute to a better understanding of the Global Financial Crisis Values in general have been relatively neglected by economists This is not because there is doubt about their significance but rather because welfare economics and collective choice still operate within the neoclassical paradigm This volume argues that analyzing the value implications requires moving from the neoclassical framework to something that is broader and multidisciplinary Financial Behavior H. **Too Smart for Our Own Good: Ingenious Investment Strategies, Illusions of Safety, and Market Crashes**  
Bruce I. Jacobs, 2018-08-17 How investment strategies designed to reduce risk can increase risk for everyone and can crash markets and economies. Financial crises are often blamed on unforeseeable events the unforgiving nature of capital markets or just plain bad luck. Too Smart for Our Own Good argues that these crises are caused by certain alluring investment strategies that promise both high returns and safety of capital. In other words the severe and widespread crises we have suffered in recent decades were not perfect storms. Instead they were made by us. By understanding how and why this is so we may be able to avoid or ameliorate future crises and maybe even anticipate them. One of today's leading financial thinkers Bruce I Jacobs examines recent financial crises including the 1987 stock market crash the 1998 collapse of the hedge fund Long Term Capital Management the 2007 2008 credit crisis and the European debt crisis and reveals the common threads that explain these market disruptions. In each case investors in search of safety were drawn to novel strategies that were intended to reduce risk but actually magnified it and blew up markets. Too Smart for Our Own Good takes a behind the curtain look at The inseparable nature of investment risk and reward and the often counterproductive effects of some popular approaches for reducing risk. A trading strategy known as portfolio insurance and the key role it played in the 1987 stock market crash. How option related trading disrupted markets in the decade following the 1987 crash. Why the demise of Long Term Capital Management in 1998 wreaked havoc on US stock and bond markets. How mortgage backed financial products

by shifting risk from one party to another created the credit crisis of 2007 2008 and contributed to the subsequent European debt crisis This broad detailed investigation of financial crises is the most penetrating and objective look at the subject to date In addition Jacobs an industry insider offers invaluable insights into the nature of investment risk and reward and how to manage risk Risk is unavoidable especially in investing and financial markets connect us all Until we accept these facts and manage risk in responsible ways major crises will always be just around the bend Too Smart for Our Own Good is a big step toward smarter investing and a better financial future for everyone
