Our Blue Planet Ben Ford,Jessi J. Halligan,Alexis Catsambis,2020 Our Blue Planet provides a comprehensive introduction to the field of maritime and underwater archaeology Situating the field within the broader study of history and archaeology this book advocates that an understanding of how our ancestors interacted with rivers lakes and oceans is integral to comprehending the human past Our Blue Planet covers the full breadth of maritime and underwater archaeology including formerly terrestrial sites drowned by rising sea levels coastal sites and a wide variety of wreck sites ranging across the globe and spanning from antiquity to World War II Beginning with a definition of the field and several chapters dedicated to the methods of finding recording and interpreting submerged sites Our Blue Planet provides an entry point for all readers whether or not they are familiar with maritime and underwater archaeology or archaeology in general The book then shifts to a thematic approach with chapters exploring human interactions with the watery world both along the coasts and by ship These chapters discuss the relationships between culture technology and environment that allowed humans through time to spread across the globe Because ships were the primary means for humans to interact with large bodies of water they are the focus of several chapters on the development of shipbuilding technology the lives of sailors and the uses of ships in exploration expansion and warfare The book ends with chapters on how and why the non renewable

submerged archaeological record should be managed so that both current and future generations can learn from the achievements and failures of past societies as well as on how anyone can become involved in maritime and underwater archaeology Throughout the reader benefits from the personal reflections of a number of leading figures in the field The Water Defenders Robin Broad, John Cavanagh, 2021-03-23 Winner of the 2021 Duke University Juan Mendez Award Named one of The Progressive s Favorite Books of 2021 and one of the Best of Books 2021 by Foreign Affairs The David and Goliath story of ordinary people in El Salvador who rallied together with international allies to prevent a global mining corporation from poisoning the country s main water source At a time when countless communities are resisting powerful corporations from Flint Michigan to the Standing Rock Reservation to Didipio in the Philippines to the Gualcarque River in Honduras The Water Defenders tells the inspirational story of a community that took on an international mining corporation at seemingly insurmountable odds and won not one but two historic victories In the early 2000s many people in El Salvador were at first excited by the prospect of jobs progress and prosperity that the Pacific Rim mining company promised However farmer Vidalina Morales brothers Marcelo and Miguel Rivera and others soon discovered that the river system supplying water to the majority of Salvadorans was in danger of catastrophic contamination With a group of unlikely allies local and global they committed to stop the corporation and the destruction of their home Based on over a decade of research and their own role as international allies of the community groups in El Salvador Robin Broad and John Cavanagh unspool this untold story a tale replete with corporate greed a transnational lawsuit at a secretive World Bank tribunal in Washington violent threats murders and surprisingly victory The husband and wife duo immerses the reader in the lives of the Salvadoran villagers the journeys of the local activists who sought the truth about the effects of gold mining on the environment and the behind the scenes maneuverings of the corporate mining executives and their lawyers The Water Defenders demands that we examine our assumptions about progress and prosperity while providing valuable lessons for those fighting against destructive corporations in the United States and across the world **Environmental Change and Security Project Report** ,1999
