Ecological Stewardship:

Environmental Stewardship Robert James Berry, 2006-03-13 Is stewardship a useful way of regarding our relationship with our environment or is it a dangerous excuse for plunder Is it possible for us to be effective stewards This book gathers together expositions of stewardship with criticisms of the concept and adds other contributions written especially for this collection

Principles of Ecosystem Stewardship F Stuart Chapin III, Gary P. Kofinas, Carl Folke, 2009-06-12 The world is undergoing unprecedented changes in many of the factors that determine its fundamental properties and their influence on society These changes include climate the chemical composition of the atmosphere the demands of a growing human population for food and shelter and the mobility of organisms and natural products cultural perspectives and information flows The magnitude and widespread nature of these changes pose serious challenges in managing the ecosystem services on which society depends Moreover many of these changes are strongly influenced by human activities so future patterns of change will continue to be influenced by society's choices and governance The purpose of this book is to provide a new framework for natural resource management a framework based on stewardship of ecosystems for human well being in a world dominated by uncertainty and change The goal of ecosystem stewardship is to respond to and shape change in social ecological systems in order to sustain the supply and opportunities for use of ecosystem services by society The book links recent advances in the theory of resilience sustainability and vulnerability with practical issues of ecosystem management and governance The book is aimed at advanced undergraduates and beginning graduate students of natural resource management as well as professional managers community leaders and policy makers with backgrounds in a wide array of disciplines including ecology policy studies economics sociology and anthropology

What is Urban Environmental Stewardship? Michele Romolini, 2012 Constructing a framework to convey the layered meanings of stewardship will help to focus and guide future research A cognitive mapping technique was used to elicit responses to the question What is environmental stewardship Semistructured interviews were conducted with representatives of nine Seattle environmental organizations a group of practitioners who collectively represent over 100 years of experience in the field Program planners and managers have particularly direct experiences of stewardship Cognitive mapping enables participants to explore then display their particular knowledge and perceptions about an idea or activity Analysis generated thematic structural representations of shared concepts Results show that the practitioners have multilayered perceptions of stewardship from environmental improvement to community building and from actions to outcomes

Grassroots Stewardship F Stuart Chapin III, 2020-06-03 In a society more concerned with how to cope with existential dread than how to make actionable changes to save the planet a surprisingly large number of Americans identify as environmentalists What can individual people do to lessen human impacts on the planet This is not an easy question Most research is focused on large scale changes that go beyond anything an individual can accomplish and people are left feeling defeated rather than inspired to make changes in their everyday lives

Change starts at home and F Stuart Chapin III has assembled a book for people who want to learn more about global changes and more importantly what they can do about them starting today Grassroots Stewardship approaches our current situation with an educated sense of hope and positivity This book emphasizes actions by individuals rather than governmental or corporate institutions to trigger transformational change Readers will learn what they can do to most significantly transform their communities and the planet with more sustainable pathways *Ecological Stewardship* Robert C.

Robert C. Szaro,William T. Sexton,1999 This text addresses six ecological themes shifting public values expectations and laws social and cultural dimensions humans as agents of ecological changes biological and ecological dimensions economic dimensions and information collection and evaluation The set includes a graphically illustrated summary volume synthesizing the key scientific and management findings and conclusions of the six topics The book is accompanied by a CD containing the full text of the three volumes in PDF format searchable by table of contents and keywords *Ecological Stewardship*

William T. Sexton,1999 *Democracy and the Claims of Nature* Ben A. Minteer,Bob Pepperman Taylor,2002 In *Democracy and the Claims of Nature* the leading thinkers in the fields of environmental political and social theory come together to discuss the tensions and sympathies of democratic ideals and environmental values The prominent contributors reflect upon where we stand in our understanding of the relationship between democracy and the claims of nature *Democracy and the Claims of Nature* bridges the gap between the often competing ideals of the two fields leading to a greater understanding of each for the other **Urban Environmental Stewardship and Civic Engagement** Dana Fisher,Erika Svendsen,James

Connolly,2015-02-11 Once considered the antithesis of a verdant and vibrant ecosystem cities are now being hailed as highly efficient and complex social ecological systems Emerging from the streets of the post industrial city are well tended community gardens rooftop farms and other viable habitats capable of supporting native flora and fauna At the forefront of this transformation are the citizens living in the cities themselves As people around the world increasingly relocate to urban areas this book discusses how they engage in urban stewardship and what civic participation in the environment means for democracy Drawing on data collected through a two year study of volunteer stewards who planted trees as part of the MillionTreesNYC initiative in the United States this book examines how projects like this can make a difference to the social fabric of a city It analyses quantitative survey data along with qualitative interview data that enables the volunteers to share their personal stories and motivations for participating revealing the strong link between environmental stewardship and civic engagement As city governments in developed countries are investing more and more in green infrastructure campaigns to change the urban landscape this book sheds light on the social importance of these initiatives and shows how individuals efforts to reshape their cities serve to strengthen democracy It draws out lessons that are highly applicable to

global cities and policies on sustainability and civic engagement **Ecological Stewardship: Public expectations, values and law. Social and cultural dimensions. Economic dimensions. Information and data management** William T. Sexton, 1999 Earth Stewardship Ricardo Rozzi, F. Stuart Chapin III, J. Baird Callicott, S.T.A. Pickett, Mary E. Power, Juan J. Armesto, Roy H. May Jr., 2015-03-26 This book advances Earth Stewardship toward a planetary scale presenting a range of ecological worldviews practices and institutions in different parts of the world and to use them as the basis for considering what we could learn from one another and what we could do together Today inter hemispheric intercultural and transdisciplinary collaborations for Earth Stewardship are an imperative Chapters document pathways that are being forged by socio ecological research networks religious alliances policy actions environmental citizenship and participation and new forms of conservation based on both traditional and contemporary ecological knowledge and values The Earth Stewardship Initiative of the Ecological Society of America fosters practices to provide a stable basis for civilization in the future Biocultural ethic emphasizes that we are co inhabitants in the natural world no matter how complex our inventions may become Peter Raven *Ecological Stewardship* Robert C. Van Dyke, David C. Mahan, Joseph K. Sheldon, Raymond H. Brand, 1996-03-06 Biologists Fred Van Dyke David C Mahan Joseph K Sheldon and Raymond H Brand provide hope for today s environmental crisis and bring Scripture into dialogue with current scientific findings and commitments **Land Stewardship in the Next Era of Conservation** V. Alaric Sample, 1991 The Nature of Environmental Stewardship Johnny Wei-Bing Lin, 2016 Environmental issues appear deceptively simple science tells us what the problems are and how to solve them and for Christians the Bible motivates us to care for creation And yet both in society in general as well as in the Christian church in particular we cannot seem to agree on what to do regarding environmental issues In this book climate scientist Johnny Wei Bing Lin argues that determining the content of environmental stewardship far from being a straightforward exercise is a difficult and complex endeavor He sets forth a general taxonomy drawing from worldviews ethical theories science epistemology science policy studies politics and economics that can help us better understand what excellent creation care consists of and how to bridge the differences people have regarding environmental issues Dr Lin wants peace between folks who are well intentioned but unable to agree be they Christians or not Peace as we wrestle with science and Scripture over our stewardship of God s beloved creation Lin gives us well considered ways to sift competing views and supposed facts This book comes from a master teacher and irenic fellow struggler A very important synthesis of

worldview driven informed arguments Terry Morrison Director Emeritus Faculty Ministry InterVarsity Christian Fellowship USA By carefully breaking environmental stewardship down into its component parts this book offers readers a framework to dialogue instead of debate the imperative of creation care Grappling with the fact that today s ecological and economic challenges cannot be contained by a simple ideology nor a single imagination Lin guides us toward both a practical synthesis of collective human wisdom and a higher level of conscientiousness in protecting all that God loves Kaleb Nyquist Steering Committee Member Young Evangelicals for Climate Action Johnny Wei Bing Lin BS and MS Stanford University PhD UCLA was Professor of Physics at North Park University where he remains Affiliate Professor of Physics and Engineering Currently he is Senior Lecturer and Director of Undergraduate Computing Education in the Computing and Software Systems Division at the University of Washington Bothell

Christian Faith and Environmental Stewardship Daniel K. Lagat, 2019-03-15 This book covers the contribution of Christianity in the care stewardship and management of the environment It uses ideas from the logical position of a Christian created in God s image redeemed by God and given responsibility to subdue and keep the earth arguing that a Christian has the responsibility and mandate to care for the environment It shows that successful stewardship happens when a Christian is aware of God s intention for creation exerts effort to increase it and is expected to give an account to God for their actions toward it The book presents environmental concerns in Kenya as an opportunity for change describing situations and why they could become opportunities for change Seven worldviews are presented that discourage Christians who want to do environmental stewardship and Christian theological doctrines are discussed that could be used to cause ecclesial participation in environmental stewardship Finally the book envisions a Conserving Church with specific activities the church can do to successfully influence people to do environmental stewardship

JOURNEY TOWARD ENVIRONMENTAL S Michael D. Zagata Phd, 2016-09-28 A healthy environment and a healthy economy are not mutually exclusive Instead they are inextricably intertwined Companies that manage environmental compliance as a profit opportunity gain a competitive advantage Environmental advocacy groups that push for emotional as opposed to science based solutions are unlikely to achieve success in improving environmental quality As a result scarce capital is wasted and those asked to fund such programs are more likely to engage in pushback Review Journey Is a must read for the lay person and professional alike Zagata has done it all Professor and ecological researcher officer for national wildlife and conservation organizations Director and VP of environmental health and safety for major energy companies Commissioner of New York State Department of Environmental Conservation So he has labored and led both as a policy creator and enforcer He certainly knows as well that tricky interface between political world and the best aims of a life long fisherman hunter and conservationist In sum he is a wise and balanced teacher of the principles of environmental stewardship Alan B Donovan Ph D SUNY Oneonta President Emeritus Review You need only read through the first three paragraphs of the author s opening section to realize that Mike Zagata has a unique perspective on the environmental movement over the past 40 years A

Journey to Environmental Stewardship chronicles a remarkable career in conservation that included roles as teacher environmental policy lobbyist corporate environmental leader chief environmental regulator and CEO of a national conservation group Having worked with Mike my respect for him is best expressed by someone who also reported to him Mike espoused a higher standard He did not accept that it was enough to merely operate in compliance with the law He understood that sometimes the right thing to do is not just the minimum that one can get away with
