## **Meteorology Today Canadian Edition:**

*Meteorology Today* C. Donald Ahrens, Peter Lawrence Jackson, Christine E. J. Jackson, 2015-11-15 **Meteorology Today** C. Donald Ahrens, Peter Lawrence Jackson, Christine E. O. Jackson, 2012 *Meteorology Today* 1st Canadian edition is the first textbook of its type written specifically with the needs of the Canadian market and its unique meteorological environment in mind. This first Canadian edition builds upon the tried and tested strengths of the Ahrens Meteorology series and provides a more relevant resource for Canadian students and instructors by ensuring that Canadian content practices, conventions and examples are used throughout. An Earth Systems feature, the first of its kind in Ahrens, has been developed for this edition presenting the interconnectedness of elements and providing a peek at the chapter content. This visual table of contents highlights the Earth system components reflected in each chapter: the atmosphere, hydrosphere, cryosphere, lithosphere, biosphere and anthrosphere. The relationships between the chapter's content and Earth systems are further expanded upon in the introduction of each chapter. *Marine Fog: Challenges and Advancements in Observations, Modeling, and Forecasting* Darko Koračin, Clive E. Dorman, 2017-01-28 This volume presents the history of marine fog research and applications and discusses the physical processes leading to fog's formation, evolution and dissipation. A special emphasis is on the challenges and advancements of fog observation and modeling as well as on efforts toward operational fog forecasting and linkages and feedbacks between marine fog and the environment. *Instructor's Resource DVD to Accompany Meteorology Today, First Canadian Edition* [by] C. Donald Ahrens, Peter L. Jackson, Christine E.J. Jackson, 2012

*Meteorology Today* C. Donald Ahrens, 2003 **METEOROLOGY TODAY** has for many years been one of the most widely used and authoritative texts for the introductory meteorology course. Each edition is extensively reviewed by leading researchers in the field to ensure that the text remains completely up to date and reflects today's current understanding of meteorological concepts. Author Donald Ahrens has been widely praised for his ability to explain relatively complicated ideas so that even under prepared students can understand them. The text's clear and inviting presentation is supplemented by numerous pedagogical features that help augment students' understanding. Introductory stories found at the beginning of each chapter draw students naturally into the discussion. In chapter reviews then help students to consolidate their understanding as they read while four types of end of chapter exercises provide opportunities for everything from further review to in class discussion questions. Graphics are carefully designed and subsequently refined so that the key ideas clearly emerge. Many of the photos in the book are taken by the author and provide unmatched images of dramatic weather phenomena. A unique and popular feature over this title's seven editions has been the foldout cloud chart at the back of the book. A wealth of online resources accompanies **METEOROLOGY TODAY** Seventh Edition allowing professors to integrate striking and illuminative interactive weather exercises into their course. Many of the exercises on the BLUE SKIES CD ROM packaged FREE with each new copy of the text are tied to downloadable real time weather data offering instructors an easy

way to bring the exploration of current weather events into the course discussion
