#### Personal Protective Equipment

U. S. Labor, Occupational Administration, 2012-06-25 OSHA 3151 12R Personal Protection Equipment Hazards exist in every workplace in many different forms sharp edges falling objects flying sparks chemicals noise and a myriad of other potentially dangerous situations. The Occupational Safety and Health Administration OSHA requires that employers protect their employees from workplace hazards that can cause injury. Controlling a hazard at its source is the best way to protect employees. Depending on the hazard or workplace conditions OSHA recommends the use of engineering or work practice controls to manage or eliminate hazards to the greatest extent possible. For example building a barrier between the hazard and the employees is an engineering control changing the way in which employees perform their work is a work practice control. When engineering work practice and administrative controls are not feasible or do not provide sufficient protection employers must provide personal protective equipment PPE to their employees and ensure its use.
