Gatrell, Gregory D. Bierly, Ryan R. Jensen, Rajiv R. Thakur, 2020-11-16 The investigation of the interactions between human and physical systems poses unique conceptual, methodological and practical challenges. This book establishes a spatial science framework for policymakers, social scientists and environmental researchers as they explore and analyze complex problems. The authors provide guidance for scientists, writers and students across a broad range of fields on how to tackle discipline specific issues of space, place and scale as they propose and conduct research in the spatial sciences. This practical textbook and overview blends plenty of concrete examples of spatial research and case studies to familiarize readers with the research process, demystifying and illustrating how it is actually done. The appendix contains both completed and in progress proposals for MA and PhD theses and dissertations, as well as successful research grants. By emphasizing research as a learning and experiential process while providing students with the encouragement and skills needed for success in proposal writing, *Research Design and Proposal Writing in Spatial Science* can serve as a textbook for research design or project based courses at the upper division undergraduate and graduate level.
