Artificial General Intelligence, 2008 Pei Wang,Ben Goertzel,Stan Franklin,2008 Includes full length papers short position statements and also the papers presented in the post conference workshop on the sociocultural ethical and futurological implications of Artificial General Intelligence AGI   **Artificial General Intelligence 2008** P. Wang,B. Goertzel,S. Franklin,2008-02-18 The field of Artificial Intelligence AI was initially directly aimed at the construction of thinking machines that is computer systems with human like general intelligence But this task proved more difficult than expected As the years passed AI researchers gradually shifted focus to producing AI systems that intelligently approached specific tasks in relatively narrow domains In recent years however more and more AI researchers have recognized the necessity and the feasibility of returning to the original goal of the field Increasingly there is a call to focus less on highly specialized narrow AI problem solving systems and more on confronting the difficult issues involved in creating human level intelligence and ultimately general intelligence that goes beyond the human level in various ways Artificial General Intelligence AGI as this renewed focus has come to be called attempts to study and reproduce intelligence as a whole in a domain independent way Encouraged by the recent success of several smaller scale AGI related meetings and special tracks at conferences the initiative to organize the very first international conference on AGI was taken with the goal to give researchers in the field an opportunity to present relevant research results and to exchange ideas on topics of common interest In this collection you will find the conference papers full length papers short position statements and also the papers presented in the post conference workshop on the sociocultural ethical and futurological implications of AGI   **Artificial General Intelligence** Patrick Hammer,Marjan Alirezaie,Claes Strannegård,2023-05-23 This book constitutes the refereed proceedings of the 16th International Conference on Artificial General Intelligence AGI 2023 held in Stockholm Sweden in June 2023 The 35 full papers and one short paper presented in this book were carefully reviewed and selected from 72 submissions The papers cover topics from foundations of AGI to AGI approaches and AGI ethics to the roles of systems biology goal generation and learning systems and so much more   **Artificial General Intelligence** Bas Steunebrink,Pei Wang,Ben Goertzel,2016-06-24 This book constitutes the refereed proceedings of the 9th International Conference on Artificial General Intelligence AGI 2016 held in New York City NY USA in July 2016 as part of HLAI 2016 the Joint Multi Conference on Human Level Artificial Intelligence 2016 The 24 full papers 2 short papers and 10 poster papers presented were carefully reviewed and selected from 67 submissions AGI research differs from the ordinary AI research by stressing on the versatility and wholeness of intelligence and by carrying out the engineering practice according to an outline of a system comparable to the human mind inSelf a certain sense   Artificial General Intelligence Jürgen Schmidhuber,Kristinn R. Thorisson,Moshe Looks,2011-07-19 This book constitutes the refereed proceedings of the 4th International Conference on Artificial General Intelligence AGI 2011 held in Mountain View CA USA in August 2011 The 28 revised full papers and 26 short papers were

carefully reviewed and selected from 103 submissions The papers are written by leading academic and industry researchers involved in scientific and engineering work and focus on the creation of AI systems possessing general intelligence at the human level and beyond **Artificial General Intelligence** Joscha Bach,Ben Goertzel,Matthew Iklé,2012-12-04 This book constitutes the refereed proceedings of the 5th International Conference on Artificial General Intelligence AGI 2012 held in Oxford UK in December 2012 The 34 revised full papers presented together with 4 invited keynote lectures were carefully reviewed and selected from 80 submissions The papers are written by leading scientists involved in research and development of AI systems possessing general intelligence at the human level and beyond with a special focus on humanoid robotics and AGI cognitive robotics creativity and AGI the future evolution of advanced AGIs and the dynamics of AGI goal systems *Artificial General Intelligence* Matthew Iklé,Arthur Franz,Rafal Rzepka,Ben Goertzel,2018-08-02 This book constitutes the proceedings of the 11th International Conference on Artificial General Intelligence AGI 2018 held in Prague Czech Republic in August 2018 The 19 regular papers and 10 poster papers presented in this book were carefully reviewed and selected from 52 submissions The conference encourage interdisciplinary research based on different understandings of intelligence and exploring different approaches As the AI field becomes increasingly commercialized and well accepted maintaining and emphasizing a coherent focus on the AGI goals at the heart of the field remains more critical than ever **Working Through Synthetic Worlds** Kenneth W. Kisiel,2018-04-17 Virtual environments VE are human computer interfaces in which the computer creates a sensory immersing environment that interactively responds to and is controlled by the behaviour of the user Since these technologies will continue to become more reliable more resolute and more affordable it s important to consider the advantages that VEs may offer to support business processes The term synthetic world refers to a subset of VEs having a large virtual landscape and a set of rules that govern the interactions among participants Currently the primary motivators for participation in these synthetic worlds appear to be fun and novelty As the novelty wears off synthetic worlds will need to demonstrate a favourable value proposition if they are to survive In particular non game oriented worlds will need to facilitate business processes to a degree that exceeds their substantial costs for development and maintenance Working Through Synthetic Worlds explores a variety of different tasks that might benefit by being performed within a synthetic world The editors use a distinctive format for the book consisting of a set of chapters composed of three parts a story or vignette that describes work conducted within a synthetic world based loosely on the question what will work be like in the year 2025 founded on the expert authors expectations of plausible future technologies a scholarly review of the technologies described by the stories and the current theories related to those technologies a prescription for future research required to bridge the current state of the art with the notional worlds described in the stories The book will appeal to undergraduate and graduate students professors scientists and engineers managers in high tech industries and software developers **Artificial General Intelligence 2008** P.
