

Lesson/Activity:

Drama:

- Instruct students on how to use their bodies to create tableaus (frozen pictures) of the shapes from the story. Students should use facial expressions, imagination, and varying levels to represent the text.
- Students will be divided into small groups. Each group will be assigned to represent the shapes during the reading (e.g., triangle, square, pentagon).
- The teacher will guide them in problem-solving how to connect their bodies to form the correct number of sides and vertices for their assigned shape.
- For example, three students could form a triangle by holding hands and extending their bodies to create the three sides and three vertices. Students will practice holding their poses silently, embodying the static nature of a tableau.

Students may also be given the option to choose their own shape or part of the story.

Wrap Up:

- Take a "snapshot" of the tableaus by pretending to click a camera and take a pretend picture.
- Have students discuss what they see in the tableau and how it represents the text.

Teaching Creatively and Teaching Creativity Mary Banks Gregerson, Heather T. Snyder, James C.

Kaufman, 2012-11-13 Creative teaching as well as teaching creativity are cutting edge issues in psychology today as recent academic and popular media coverage has shown. This volume expands on that interest with chapter authors drawn from interdisciplinary areas. It includes examples of creatively teaching across the education system including preschool K-12, undergraduate and graduate level education. The variety of subjects covered by the chapters include psychology, math, science and reading. In addition to creative teaching which may lead to enhanced learning and achievement in students as well as enhanced creativity, another focus is teaching with the objective to enhance creativity. [Dance Integration](#) Karen A.

Kaufmann, Jordan Dehline, 2014-06-23 Do you want to create a rich and vibrant classroom environment that stimulates your students' minds in multiple ways? Transform your teaching through incorporating the arts in your mathematics and science curriculums. Then [Dance Integration: 36 Dance Lesson Plans for Science and Mathematics](#) is just the book for you! The dance lesson plans in this groundbreaking book infuse creativity in mathematics and science content. Students will gain a wealth of critical knowledge, deepen their critical thinking skills, and learn to collaborate and communicate effectively. Written for K-5 teachers who are looking for creative ways to teach the standards, [Dance Integration](#) will help you bring your mathematics and science content to life as you guide your students to create original choreography in mathematics and science and perform it for one another. In doing so, you will help spark new ideas for your students out of those two curriculums no more same-old, same-old. And in the freshness of these new ideas, students will increase comfort in performing in front of one another and discussing performances while deepening their understanding of the core content through their kinesthetic experiences. The creative thinking skills that you will teach through these lesson plans and the innovative learning that dance provides are what set this book apart from all others in the field. [Dance Integration](#) was extensively field tested by authors Karen Kaufmann and Jordan Dehline. The book contains these features: Instructions on developing modules integrating mathematics and science; Ready-to-use lesson plans that classroom teachers, physical education teachers, dance educators, and dance specialists can use in teaching integrated content in mathematics and science; Tried-and-true methods for connecting to 21st century learning standards and integrating dance into K-5 curriculums. This book, which will help you assess learning equally in dance, science, and mathematics, is organized in three parts: Part I introduces the role of dance in education, defines dance integration, and describes the uses, benefits, and effects of dance when used in tandem with another content area; Part II offers dance and mathematics lessons that parallel the common core standards for mathematics; Part III presents dance and science learning activities in physical science, life science, earth and space sciences, investigation, experimentation, and technology. Each lesson plan includes a warm-up, a developmental progression of activities, and formative and summative assessments and reflections. The progressions help students explore, experiment, create, and perform their understanding of

the content The plans are written in a conversational narrative and include additional notes for teachers Each lesson explores an essential question relevant to the discipline and may be taught in sequence or as a stand alone lesson Yes Dance Integration will help you meet important standards Common Core State Standards for Mathematics Next Generation Science Standards Standards for Learning and Teaching Dance in the Arts More important this book provides you with a personal aesthetic realm in your classroom that is not part of any other school experience It will help you bring joy and excitement into your classroom And it will help you awaken a community of active and eager learners Isn't that what education is all about **Resources in Education** ,1990-07 **Striving for Excellence** ,1994 **Teaching the Language Arts** Cathy Collins Block,2001 This book explains and demonstrates with a clear step by step approach how communication and thinking competencies can be enhanced through instruction This revision elaborates further on a language arts program built to focus on the needs of individual students Each of the fourteen chapters is divided into three sections covering theoretical foundations practice and professional development giving the text a practical usable organization The second and third sections apply the principles from the first section to the classroom Features in these sections show specific teaching strategies that offer practical ideas for teachers to develop an ongoing and successful teaching repertoire For Language Arts teachers **Resources in Vocational Education** ,1977 **A Guide to Developing Communication Across the Curriculum** Beatrice A.
