**Leadership** Marian Iszatt-White,Christopher Saunders,2017

This accessible and comprehensive textbook draws on the reader's own experience of leadership in an employment context. The text adopts a critical and thematic approach to the discussion of core debates and emerging topics while offering a wealth of case studies and other learning tools to help students put leadership theory into practice. **Modern Police Leadership** Mark Roycroft, Lindsey Brine, 2021-09-01. This edited textbook covers a range of key operational and strategic aspects of police administration from experts who have both an academic and practitioner background. It sets out the modern challenges and demands facing the police and then covers the theory and practice of how to deal with such issues including the leadership skills which are required at every level. These challenges are covered in sections on the use of force, international policing, investigation of new crimes and forensic investigation, counter terrorism, intelligence, mental well-being, and community policing. Some of the key themes discussed include dealing with public demand for police services, diversity, and partnership interoperability, working locally, regionally, and internationally. This book is designed at all levels of warranted officer and speaks to undergraduate and postgraduate policing students with a range of pedagogic features including seminar and exam questions. **LEADERSHIP AND ORGANISATIONAL PERFORMANCE** Dr. Godwin C. Arikibe, 1901.

Leadership is inherent in every being despite one's job profile. But qualitative training and other traits are very important for the right behaviours. Every follower possesses an attribute of a leader but because these are somewhat concealed to lead effectively becomes a huge challenge to many. This book is as a result of many years of research. It focused on discovering those behavioural attributes that could combine effectively with the leader's competing roles to enhance his performance. A Competing Value Framework (CVF) was applied to understand the leadership behaviours, characteristics, attributes, and roles that could influence a leader even in the face of contingency factors. The result was quite revealing. Leaders that combine their roles with other attributes/skills achieve behavioural complexity which are performance enhancing behaviours. Furthermore, leaders are distinguished by their unique mental attitude, particularly in four roles they play: motivation, vision, analytic, and task master roles. Combination of these with other attributes and characteristics enhances the leadership complexity. This book is a useful material for those in the ministries, academia, and organisations of different sizes. It is a book every leader must possess to comprehend the behavioural complexities relevant for organisational performance.

**Clinical Reasoning and Care Coordination in Advanced Practice Nursing** RuthAnne Kuiper, Daniel J. Pesut, Tamatha E. Arms, 2016-04-28. Teaches students how to think like an APRN. This book describes an innovative model for helping APRN students develop the clinical reasoning skills required to navigate complex patient care needs and coordination in advanced nursing practice. This model, the Outcome Present State Test (OPT), encompasses a clear step-by-step process that students can use to learn the skills of differential diagnosis and hone clinical reasoning strategies. This method facilitates understanding of the relationship among patient problems, outcomes, and interventions that focus on promoting patient safety and care coordination. It moves beyond traditional ways of problem solving by focusing on patient scenarios and stories and

juxtaposing issues and outcomes that have been derived from an analysis of patient problems evidence based interventions and desired outcomes The model offers a blueprint for using standardized health care languages and provides strategies for developing reflective and complex thinking that becomes habitual It embodies several levels of perspective related to patient centered care planning team centered negotiation and health care system considerations Through patient stories and case scenarios the text highlights care coordination strategies critical in complex patient situations It provides students with the tools to collect patient information determine priorities for care and test interventions to reach health care outcomes by making clinical judgments during the problem solving process Concept maps illustrate complex patient care issues and how they relate to each other For faculty use the text provides links to relevant APN competencies and provides guidelines for using the OPT when supervising students in field settings Key Features Delivers a concrete learning model for developing creative thinking and problem solving in the clinical setting Offers a blueprint and structure for using standardized health care languages Includes patient stories and case scenarios to illustrate effective use of the OPT model Highlights care coordination strategies associated with complex client situations with the use of the Care Coordination Clinical Reasoning model Reinforces methods of reaching a diagnosis outcomes and interventions and how to duplicate the process
