and using three geographical concepts place space and landscapes as different lenses I map out the texture of A ED 489 and A ED 489 making process First using the idea of place as a way of making sense of self practice and others as community as three rhythms I explore the possibilities and potentialities of the course for the professional development of becoming art teachers in my own understanding Second using the idea of space time I a moving self and full participant investigate A ED 489 making process throughout the repetitive and cyclical curriculum practices with the pre service art teachers and the faculty Third I conduct narrative mapping interviews in order to bring light how each participant embodied A ED 489 experience as a whole and related diverse curriculum space time s to each other Throughout this research I understand that mapping functions as both a method of rhythm analysis in space time s of becoming and a metaphor of participants inhabitant knowledge exploring A ED 489 experience as a temporal lived landscape making a bridge between the previous and the future experiences for becoming art teacher educator
