Becoming Biosubjects Bodies Systems Technology:

Becoming Biosubjects Neil Gerlach, Sheryl Hamilton, Rebecca Sullivan, Priscilla Walton, 2011-01-01 *Becoming Biosubjects* examines the ways in which the Canadian government media courts and everyday Canadians are making sense of the challenges being posed by biotechnologies The authors argue that the human body is now being understood as something that is fluid and without fixed meaning This has significant implications both for how we understand ourselves and how we see our relationships with other forms of life Focusing on four major issues the authors examine the ways in which genetic technologies are shaping criminal justice practices how policies on reproductive technologies have shifted in response to biotechnologies the debates surrounding the patenting of higher life forms and the Canadian and global response to bioterrorism Regulatory strategies in government and the courts are continually evolving and are affected by changing public perceptions of scientific knowledge The legal and cultural shifts outlined in *Becoming Biosubjects* call into question what it means to be a Canadian a citizen and a human being

Testing for Athlete Citizenship Kathryn E. Henne, 2015-04-17 Incidents of doping in sports are common in news headlines despite regulatory efforts How did doping become a crisis What does a doping violation actually entail Who gets punished for breaking the rules of fair play In *Testing for Athlete Citizenship* Kathryn E Henne a former competitive athlete and an expert in the law and science of anti doping regulations examines the development of rules aimed at controlling performance enhancement in international sports As international and celebrated figures athletes are powerful symbols yet few spectators realize that a global regulatory network is in place in an attempt to ensure ideals of fair play The athletes caught and punished for doping are not always the ones using performance enhancing drugs to cheat In the case of female athletes violations of fair play can stem from their inherent biological traits Combining historical and ethnographic approaches *Testing for Athlete Citizenship* offers a compelling account of the origins and expansion of anti doping regulation

and gender verification rules Drawing on research conducted in Australasia Europe and North America Henne provides a detailed account of how race gender class and postcolonial formations of power shape these ideas and regulatory practices Testing for Athlete Citizenship makes a convincing case to rethink the power of regulation in sports and how it separates athletes as a distinct class of citizens subject to a unique set of rules because of their physical attributes and abilities
