Identification Practices in Twentieth-Century Fiction Rex Ferguson,2021 Identifying the individual in the 20th century has given rise to technical innovations including fingerprint analysis and DNA profiling as well as methods for classifying identities such as identity cards and digital records This book explores the link between these techniques and the literary representation of self identity in the same period    Becoming Biosubjects Neil Gerlach,Sheryl N. Hamilton,Rebecca Sullivan,Priscilla L. Walton,2011-01-01 *Becoming Biosubjects* examines the ways in which the Canadian government media courts and everyday Canadians are making sense of the challenges being posed by biotechnologies The authors argue that the human body is now being understood as something that is fluid and without fixed meaning This has significant implications both for how we understand ourselves and how we see our relationships with other forms of life Focusing on four major issues the authors examine the ways in which genetic technologies are shaping criminal justice practices how policies on reproductive technologies have shifted in response to biotechnologies the debates surrounding the patenting of higher life forms and the Canadian and global response to bioterrorism Regulatory strategies in government and the courts are continually evolving and are affected by changing public perceptions of scientific knowledge The legal and cultural shifts outlined in *Becoming Biosubjects* call into question what it means to be a Canadian a citizen and a human being

**Contagion Narratives** R. Sreejith Varma,Ajanta Sircar,2022-12-30 This volume is a collection of ten essays that direct their gaze to the unfolding of contagions in the non classical contexts of Asia and Africa Or to borrow from the title of one of Partha Chatterjee s books they are reflections on the pandemic in most of the world Featuring many scholars of the humanities and social sciences in the Global South these chapters take as their intellectual focus the political social as well as the ethical challenges posed by the contagions in the East Through analyses of literary narratives films video games this *Contagion Narratives* traces the manufactured narratives of victimization by majority communities and the lethal divides consequently being drawn between a reconstituted authentic majority and the more vulnerable minority other in these societies The essays in this collection are animated by imaginations of liveable alternatives on a planet on the brink This volume traces lineages to Buchi Emecheta and Rabindranath Tagore rather than Albert Camus to Satyajit Ray and the indie traditions rather than Hollywood and to Buddhism rather than Christianity to track the historic journeys of modernity Using an eclectic set of analytical tools and strategies of textual criticism this volume argues that ideas of democracy even while they carry echoes of other societies are markedly different as they travel from Gaddafi s Libya to Wuhan under lockdown to colonial Bengal    Changing Landscapes for Childhood and Youth in Europe Vassiliki Deliyianni,2014-06-02 Contemporary social transformations characterised by multi dimensional globalisation and technological change have lent new impetus to the emergence of internationally oriented and interdisciplinary childhood and youth studies Analysis of sharpened polarisations of chances and risks within and between generations in specific life circumstances meets up with the re

conceptualisation of childhood and youth as social constructions within the life course As such insulated national discourses are no longer an adequate framework to address such issues economic and cultural globalisation processes exert dual and reciprocal influences restructuring societies and identities from within and without This collection offers a three fold thematic focus on the social construction of the life course privileging gendered and family transitions and transformations on the contours of not belonging in particular bringing migration and poverty into the spotlight and on the potential of virtual worlds for creating and enabling new positive and negative forms of individual social and political action on the part of young people This collection thus offers a particular snapshot of the current landscape of childhood and youth studies and it provides a set of exemplars from diverse national contexts Each chapter can stand for itself but the contributions are ordered thematically not according to the corner of the world from which they derive As the introductory chapter explores the intention is via a loose vectoring of theme and context to encourage multiple opportunities for reflection on relations between the specificities and commonalities of children s and young people s lives today This volume joins the growing library of scholarly resources for international and interdisciplinary childhood and youth studies it brings together well established and young scholars writing from an unusual range of national and cultural contexts The collection will be of interest not simply for specialist researchers and those in related fields but equally as a teaching and learning resource for higher education professionals and students in social sciences and education including courses that link theory and research with policy and practice    *Women, Biomedical Research and Art* Ninette Rothmüller, 2021-06-14 Die Studie widmet sich intersektionalen Verletzbarkeiten sozio geografischen und rassistischen Ungerechtigkeiten sowie dem Traumapotenzial von Reproduktionsmedizin Menschenhandel und Schwarzmarkt Organhandel Mittels eines empirischen kritisch diskursanalytischen k nstlerischen und philosophisch theoretischen Zugangs entwickelt die interdisziplin re Studie praktische kreative Werkzeuge f r eine P dagogik die W rde und Integrit t betont und die Menschenrechte im Alltag der betroffenen Bev lkerung unterst tzt
