Handbook of Second and Foreign Language Writing Rosa M. Manchón, Paul Kei Matsuda, 2016-09-12 The Handbook of Second and Foreign Language Writing is an authoritative reference compendium of the theory and research on second and foreign language writing that can be of value to researchers professionals and graduate students It is intended both as a retrospective critical reflection that can situate research on L2 writing in its historical context and provide a state of the art view of past achievements and as a prospective critical analysis of what lies ahead in terms of theory research and applications Accordingly the Handbook aims to provide i foundational information on the emergence and subsequent evolution of the field ii state of the art surveys of available theoretical and research basic and applied insights iii overviews of research methods in L2 writing research iv critical reflections on future developments and v explorations of existing and emerging disciplinary interfaces with other fields of inquiry

[Online Teaching and Learning](#) Carla Meskill, 2013-08-15 Online Teaching and Learning shows how learning through the internet depends on complex human interactions for success The text uses sociocultural theory as its foundational stance to empirically examine the dynamics of these interactions It

seeks to understand meaning making in all of its social linguistic and cultural complexity Each chapter examines how it is that culturally and historically situated meanings get negotiated through social mediation in online instructional venues It extends the ways we think and talk about online teaching and learning The Handbook of Peer Tutoring Russ Hodges, Daniel Sanford, Michelle Steiner, 2025-10-16 The Handbook of Peer Tutoring is the authoritative resource on the emerging interdisciplinary field of peer tutoring in higher education Addressing the multiple audiences of undergraduate tutors in advanced trainings students immersing themselves in the research of learning and writing centers professionals seeking to understand the history and current state of the field and researchers specializing in peer led learning the book gathers in one volume the voices that define the current state of the field In doing so it brings authors and ideas from previously discrete areas of study learning centers writing centers the scholarship of teaching learning communication composition developmental education psychology and others into conversation with one another and advances the case for a single shared scholarship of post secondary peer tutoring that spans numerous disciplines professional communities and continents Each contribution establishes the state of the research with a respect to a specific question or topic and proposes directions for future research Collectively the volume both synthesizes and advances the state of the field while also providing a roadmap for its future growth **Contextualizing English for Academic Purposes in Higher Education** Ian Bruce, Bee Bond, 2022-07-28 This book highlights the centrality of political and ideological issues as they relate to the positioning and practice of English for Academic Purposes EAP demonstrating that EAP cannot flourish as a profession or a discipline without an awareness of the macro and meso level political shifts that impact the wider university The volume states that the practices of EAP are in fact political acts and examines these as yet unexplored power dynamics The volume begins by considering key influences that have shaped universities and their governance and management over the last three decades and how these relate to the role and practice of EAP These influences include neoliberal economic policies governmental demands for widening participation globalization entrepreneurial approaches to higher education students as clients and therapeutism in universities Following consideration of these broader contextual issues specific chapters focus on politics and policies surrounding the recruitment and participation of international fee paying students their positioning and identity within English medium universities including issues relating to English language standards and academic integrity Further chapters then consider more local influences that shape EAP programmes such as their strategic roles within universities their management their teaching and wider academic impact A Tutor's Guide Bennett A. Rafoth, 2000 If you re a writing tutor here s a way to take everyday events in your tutoring sessions and connect them to good theory and practice English Language Teaching in Theological Contexts Kitty Barnhouse Purgason, 2010-06-28 International students in North American seminaries struggling with academic work in English Seminary students around the world finding resource materials that are still only available in English Regional seminaries in Asia Africa and Europe educating

people from many language backgrounds by offering instruction in English. These and other factors are the primary reasons for this volume. Trends in the field of Teaching English to Speakers of Other Languages (TESOL) have led to specialized English and pedagogy for areas such as business, engineering, hospitality, and so on. The time has come to acknowledge English for Bible and Theology along with specialized program design materials and instruction. English Language Teaching in Theological Contexts explores various models for assisting seminary and Bible college students in learning English while also engaging in their theological coursework. It features chapters by specialists from countries including the U.S., Brazil, Ukraine, India, the Philippines, and Korea. Part one of the book presents language teaching challenges and solutions in various places; part two focuses on specific resources to inspire readers to develop their own materials.

The Oxford Guide for Writing Tutors Melissa Ianetta, Lauren Fitzgerald, 2016. The Oxford Guide for Writing Tutors introduces two conversations to the tutor's preparation: one about the creation of knowledge in writing programs, the other about tutor research. This approach to tutor training provides several benefits. First, it allows tutors to test their theories of what might work in a writing center session and helps them to move professional conversation towards why such things happen. They bridge the theory-practice divide that often frustrates both novices and experienced tutors. By conducting research to answer such questions, tutors can help themselves, the writers with whom they work, their fellow tutors, and the writers with whom they work. And further, this approach gives the reader new methods for appreciating and critiquing scholarly work, making it easier to understand the best ways to help writers and to move the field forward. As writing tutoring programs take on a variety of forms and pursue a range of missions, this book aims to create a flexible text whose contents can be easily rearranged to support a broad spectrum of reader needs. Each chapter accordingly can be read independently; the text does not rely on a sequential reading to create meaning. The book also includes intra-textual and extra-textual references for the reader who wants to inquire further. That is, throughout the book are references to material in other chapters that might be of interest to the reader intrigued by the topic at hand. So too, in each chapter we include references to and citations of the scholarship that supports much of the common knowledge of the field, including in the Handbook both previous tutor education textbooks and research from the field. The aim is to aid the interested reader's inquiry into the scholarship of the field as well as to ground advice about practice in research that testifies to the effectiveness of a range of tutoring practices. Much of the scholarship cited throughout the book is authored by undergraduate tutor researchers as well as several former tutors who were graduate students when they published their articles. This crucial aspect best models the ways in which tutors themselves can bring together practice and research in their day-to-day work and in their informed thinking about this work. Including tutor voices is an important tradition of the tutor education textbook because these are voices that speak to the issues concerning tutors in a range of institutions and programs across the country.

WPA, Writing Program Administration, 2001

The SAGE Encyclopedia of Online Education Steven L. Danver, 2016-09-20. Online education both by for-profit

institutions and within traditional universities has seen recent tremendous growth and appeal but online education has many aspects that are not well understood The SAGE Encyclopedia of Online Education provides a thorough and engaging reference on all aspects of this field from the theoretical dimensions of teaching online to the technological aspects of implementing online courses with a central focus on the effective education of students Key topics explored through over 350 entries include Technology used in the online classroom Institutions that have contributed to the growth of online education Pedagogical basis and strategies of online education Effectiveness and assessment Different types of online education and best practices The changing role of online education in the global education system **Peer-Assisted Learning in**

Academic Libraries Erin Rinto, John Watts, Rosan Mitola, 2017-07-05 Written specifically for academic librarians and library administrators this book identifies the myriad benefits of peer assisted learning exploring how the implementation of peer assisted learning benefits information literacy instruction cocurricular outreach and reference services In this era of accountability and stretched budgets in higher education librarians need to make instructional programming both highly effective and sustainable Peer assisted learning is a methodology that has long been accepted in teaching but is relatively new as applied to academic library instruction outreach and reference This book brings together the most innovative applications of peer assisted learning in these contexts explaining specific ways to apply peer assisted learning in a variety of academic library settings for maximum benefit This guidebook begins with an extensive literature review of the theoretical underpinnings of peer assisted learning and the various benefits these programs can provide academic librarians and peer mentors The bulk of the book's content is organized into three sections that address the subjects of information literacy instruction cocurricular outreach and reference services separately Each section showcases real world examples of peer assisted learning at a variety of academic institutions Through these case studies readers can fully understand the development implementation and assessment of a peer assisted learning program and librarians and administrators will see the practical benefits of enriching the experiences of student employees Practitioners will receive inspiration and guidance through chapters that discuss training activities identify lessons learned and explain the implications for further research
