Gunning, 2005 With its inclusive view of literacy, *Creating Literacy Instruction for All Students* emphasizes methods that have been validated by research and practice while delivering the basics of all major aspects of reading and writing. The Fifth Edition of this best selling book continues to be a comprehensive practical text that provides its readers with step by step guidance for teaching reading and writing. Written by distinguished author Tom Gunning, this text features sample lessons for virtually every major literacy skill strategy and offers numerous reinforcement suggestions and generous listings of materials. With its careful balance between the theory and the practice, readers are always given the theories behind the methods, encouraging them to choose, adapt, and construct their own approaches as they create a balanced program of literacy instruction. Special emphasis has been given to adapting instruction for English language learners, struggling readers and writers, and special needs students throughout the book. Unlike comparable texts, the new edition stresses effective steps for closing the gap between achieving and struggling readers as mandated by the No Child Left Behind legislation and Reading First. **Beginning to Read and the Spin Doctors of Science** Denny Taylor, 1998 Suggesting that the contention that phonemic awareness must be taught directly and that children need explicit systematic instruction in phonics is less of a scientific fact than an exercise in political persuasion, this book presents the story of the political campaign that is taking place to change the minds of Americans about how young children learn to read. The book begins with a close look at the empirical research being used to support a massive shift in the national understandings about language, literacy, and learning, and concludes by revealing the ways in which research studies on early reading instruction are being used by the federal and state governments to support a new methodology that has turned early reading instruction into a massive business of
