Beckett Technology And The Body:

Beckett, Technology and the Body Ulrika Maude, 2009-01-29 An important reading of Beckett that foregrounds the importance of the body and the senses in his work *Beckett's Art of Salvage* Julie Bates, 2017-04-19 This innovative exploration of the recurring use of particular objects in Samuel Beckett's work is the first study of the material imagination of any single modern author Across five decades of aesthetic and formal experimentation in fiction drama poetry and film Beckett made substantial use of only fourteen objects well worn not only where they appear within his works but also in terms of their recurrence throughout his creative corpus In this volume Bates offers a striking reappraisal of Beckett's writing with a focus on the changing functions and impact of this set of objects and charts chronologically and across media the pattern of Beckett's distinctive authorial procedure The volume's identification of the creative praxis that emerges as an art of salvage offers an integrated way of understanding Beckett's writing opens up new approaches to his work and offers a fresh assessment of his importance and relevance today *The Body and the Arts* Corinne Saunders, 2009-03-26 The Body and the Arts focuses on the dynamic relation between the body and the arts the body as inspiration subject symbol and medium Contributors from a variety of disciplines explore this relation across a range of periods and art forms spanning medicine literature from the classical period to the present and visual and performing arts *Science, Technology, and Irish Modernism* Kathryn Conrad, Cólín Parsons, Julie McCormick Weng, 2019-09-13 Since W B Yeats wrote in 1890 that the man of science is too often a person who has exchanged his soul for a formula the anti scientific bent of Irish literature has often been taken as a given Science Technology and Irish Modernism brings together leading and emerging scholars of Irish modernism to challenge the stereotype that Irish literature has been unconcerned with scientific and technological change The collection spotlights authors ranging from James Joyce Elizabeth Bowen Flann O'Brien and Samuel Beckett to less studied writers like Emily Lawless John Eglinton Denis Johnston and Lennox Robinson With chapters on naturalism futurism dynamite gramophones uncertainty astronomy automobiles and more this book showcases the far reaching scope and complexity of Irish writers' engagement with innovations in science and technology Taken together the fifteen original essays in Science Technology and Irish Modernism map a new literary landscape of Ireland in the twentieth century By focusing on writers often ignored interest in science and technology this book uncovers shared concerns between revivalists modernists and late modernists that challenge us to rethink how we categorize and periodize Irish literature *Singing the Body Electric: The Human Voice and Sound Technology* Miriama Young, 2016-03-03 Singing the Body Electric explores the relationship between the human voice and technology offering startling insights into the ways in which technological mediation affects our understanding of the voice and more generally the human body From the phonograph to magnetic tape and now to digital sampling Miriama Young visits particular musical and literary works that define a century and a half of recorded sound She discusses the way in which the human voice is captured transformed or synthesised through

technology This includes the sampled voice the mechanical voice the technologically modified voice the pliable voice of the digital era and the phenomenon by which humans mimic the sounding traits of the machine The book draws from key electro vocal works spanning a range of genres from Luciano Berio's *Thema Omaggio a Joyce* to Radiohead from Alvin Lucier's *I Am Sitting in a Room* to Björk and from Pierre Henry's *Variations on a Door and a Sigh* to Christian Marclay's *Maria Callas* In essence this book transcends time and musical style to reflect on the way in which the machine transforms our experience of the voice The chapters are interpolated by conversations with five composers who work creatively with the voice and technology Trevor Wishart Katharine Norman Paul Lansky Eduardo Miranda and Bora Yoon This book is an interdisciplinary enterprise that combines music aesthetics and musical analysis with literature and philosophy *Formal Matters* Zoe Roth, 2022-03-07 *Formal Matters* re-examines the postmodernist insistence that the body escapes signification by turning to an unexpected source early and mid-century formalisms Bringing together formalism's endeavour to give shape to the ineffable with postmodernism's discursive body the book argues that embodiment or the experience of the lived corporeal body is not what resists representation but what constitutes form Working at the intersection of formalist criticism phenomenology and body studies Zoe Roth reassesses the relationship between embodiment and form in a range of modern European authors including Primo Levi Maurice Blanchot Samuel Beckett and Anne F Garreta Through close textual analysis *Formal Matters* provides a new method for grasping embodied experience where it appears most attenuated and fragmented It provides an original account of the body's relationship to language and representation while also reinvigorating formalist methods with political potential **Samuel Beckett and Medicine** Ulrika Maude, 2025-06-30 *Samuel Beckett and Medicine* offers the first sustained analysis of the author's abiding interest in medicine and medical discourses advancing insights into the representation of illness neurodiversity disability ageing and dying in his work It analyses Beckett's representation of the production of language offering new ways of understanding the often perplexing formal and stylistic experimentation of his work The book addresses the many automatic and habitual functions staged in his writing and considers the impact of nerve theory reflexes affect and the viscera on his work It advances new readings of Beckett's poetry prose and television and stage plays drawing on his reading notes on medicine and psychology and on his correspondence and critical writings Through its refusal to aestheticize embodied experience or to yield to the metaphysical consolations of literature Beckett's work challenges us to confront the intricacies of embodied being and to encounter the question of finitude **Beckett and Phenomenology** Ulrika Maude, Matthew Feldman, 2011-10-20 Existentialism and poststructuralism have provided the two main theoretical approaches to Samuel Beckett's work These influential philosophical movements however owe a great debt to the phenomenological tradition This volume with contributions by major international scholars examines the phenomenal in Beckett's literary worlds comparing and contrasting his writing with key figures including Edmund Husserl Martin Heidegger Jean Paul Sartre and Maurice Merleau-Ponty It advances an analysis of hitherto unexplored phenomenological

themes such as nausea immaturity and sleep in Beckett's work Through an exploration of specific thinkers and Beckett's own artistic method it offers the first sustained and comprehensive account of Beckettian phenomenology **The Cambridge Companion to the Body in Literature** David Hillman, Ulrika Maude, 2015-05-19 This Companion offers the first systematic analysis of the representation of the body in literature It historicizes embodiment by charting our evolving understanding of the body from the Middle Ages to the present day and addresses such questions as sensory perception technology language and affect maternal bodies disability and the representation of ageing eating and obesity pain death and dying and racialized and posthuman bodies This Companion also considers science and its construction of the body through disciplines such as obstetrics sexology and neurology Leading scholars in the field devote special attention to poetry prose drama and film and chart a variety of theoretical understandings of the body The question of multiple identities in Samuel Beckett's works Kevin Oheix, 2014-06-10 Thesis M A from the year 2014 in the subject English Language and Literature Studies Literature grade 16 20 University of Rennes 2 language English abstract Ce m moire traite des identit s plurielles et de l entre deux culturel dans les oeuvres de Samuel Beckett The void has been a great source of inspiration for Samuel Barclay Beckett and his critics who tend to take into account the characteristics of his mind rather than his writings Such a deconstructionist discourse on negative identity is redundant but also contradictory This study aims at exploring the fundamental question of multiple identities in Samuel Beckett's fictions and dramas particularly The Unnamable from the trilogy Waiting for Godot Endgame Krapp's Last Tape and other relevant works As a novelist playwright and translator Beckett can be said to be part of a revolutionary literature His rejection and exploitation of the literary tradition make him an ambivalent writer The problem of singularity regarding his works is crucial in the stabilization of identity Moreover the lack of a major theme becomes an obstacle to the definition of such works The representation of these multiple identities will be analyzed in order to elucidate the following inquiry To what extent does Beckett's texts shed light on the seminal notions of rootlessness and cultural in betweenness as well as on the rejection of identification through self exploration and radical experimentation A certain number of critical readings will be used to discuss Beckett's place in literature through his characters apparent lack of attachment to any tradition Does literature have a function in the formation of identity What sort of renovation does the Beckettian texts offer It will be first noted that his borrowings from the French and Irish traditions coupled with his aloofness to them are indicators of the complexity of his mode of communication which is itself predicated on individual and conventional systems of discourse By means of exploring the essential antagonisms that departure and return represent this study will attempt to identify the literary forms of identity and apprehend the constant redefinition of the self whose ambiguous nature have to be examined in the light of the paradox between multiplicity and reduction How are marginalization and alterity experienced in the author's post colonial writings Beckett's bilingual experience via the relationship between the man and his work will complement this research Samuel Beckett and Technology Mark

Nixon, Einat Adar, Galina Kiryushina, 2021-08-20 This collection of essays is the first comprehensive discussion of the role technology plays in shaping Beckett's trademark aesthetics *Samuel Beckett and Technology* assembles an innovative and diverse range of scholarly approaches to the topic which collectively renegotiate our understanding of his work in prose theatre film radio and television What emerges from these discussions is the centrality of technology for Beckett's creative imagination a factor that is equally enabling as it is limiting At the same time the book reveals how theories of technology can yield new readings of the way Beckett responds to the conditions of technological modernity As such Beckett's work is examined in its relation to historical and contemporary technologies discourses of technicity and techne post humanism and the digital age *Ebc*, 2008 *Samuel Beckett and the Prosthetic Body* Y. Tajiri, 2006-11-22 This book studies the representation of the body in Beckett's work focusing on the prosthetic aspect of the organs and senses While making use of the theoretical potential of the concept of prosthesis it aims to resituate Beckett in the broad cultural context of modernism in which the impact of new media and technologies was registered *The British National Bibliography* Arthur James Wells, 2009 2010 Redaktion Osnabrück, 2011-06-16 **Publications of the Modern Language Association of America**, 2009 *Art, Time and Technology* Charlie Gere, 2006-05 Breaking the time barrier Morse's inventions The writing of Van Gogh Taking off John Cage's early warning system Art in real time Is it happening Short films about flying Bibliography Index **Collective Trauma, the Body, and Literary Forms of Witnessing** Kimberly Adelle Rostan, 2007 **Surpassing Body** Herbert Blau, 1990 *Working Knowledge* Colin Symes, John McIntyre, 2000 Working Knowledge offers a comprehensive examination of the new vocationalism in higher education BOOK JACKET
