Rist,2020-08-07 Human sexuality is a very important subject especially in a cultural context such as ours in which social and work transformations offer behavioral models that are characterized by a remarkable sexual indeterminacy In Transcending Gender Ideology Antonio Malo tries to rethink sexuality with equilibrium and intellectual rigor using a philosophical approach since sexuality does not only affect biological aspects or social conditioning but above all the same essence of the relationship between man and woman Malo's reflections begin with the historical evolution of the concept of sexuality the naturalistic conception which sees the difference between man and woman as something biological and absolute and the postmodern conception which criticizes it by judging human sexuality as a socio cultural construction or gender According to Malo the limitation of the gender approach is to deny the relationship of human sexuality to the body and to the differences between man and woman In fact by rejecting these aspects they end up sustaining a limitless creativity of freedom which transforms the body into something that is used at will and relationships as something fluid Faced with these extremes Malo proposes a vision of sexuality as a personal condition or sexed condition received at the time of birth but which develops grows and matures through family models experiences and relationships Even if based on an original sexual difference sexed condition covers many other aspects physical psychological social and cultural as well as behavioral patterns and above all the personal integration of sexuality through the gift of oneself in marriage or in celibacy **Becoming a World Changing Family** Donna Thomas,2004 Your family can change the world No matter what your circumstances these fun and enriching ideas will help you share the Good News
