Becoming Human Our Past Present And Future:

Becoming Human Scientific American Editors,2013-09-23 *Becoming Human Our Past Present and Future* by the Editors of Scientific American We humans are a strange bunch We have self awareness and yet often act on impulses that remain hidden We were forged in adversity but live in a world of plenty How did we get here What is to become of us To these age old questions science has in recent years brought powerful tools and reams of data and in this eBook *Becoming Human Our Past Present and Future* we look at what these data have to tell us about who we are We know for instance that three million years ago a group of primates known as the australopithecines was walking capably on two legs the better to navigate the African savanna and yet still had long arms suited to life in the trees In Section One *Becoming Us* we search for how and why this and other transitions occurred In *Lucy's Baby* author Kate Wong discusses what the oldest juvenile skeleton tells us about how early humans walked the Earth Another article *The Naked Truth* examines why humans lost their hair and how hairlessness was a key factor in developing other human traits Section Two covers *The Secrets of our Success* and we see that human evolution and culture are often related In *The Evolution of Grandparents* Rachel Caspari shows us that as humans started to live longer grandparents played a role in family life which in turn made possible more complex social behaviors In Section Three *Migration and Colonization* we look at how scientists are studying the minuscule bits of DNA that differ from one individual to another for clues to our origins and settlements *The First Americans* illustrates the findings that have pushed back the date at which hunter gatherers colonized the Americas And in Section Four *Vanished Humans* the discovery of hobbits a human species of small stature has turned the science of human origins on its ear Where is evolution taking us We present two points of view in Section Five *Our Continuing Evolution In How We Are Evolving* Jonathan K Pritchard argues that selection pressure typically acts over tens of thousands of years which means we probably won't evolve much anytime soon But stasis is only one possible future says Peter Ward in *What May Become of Us* In adapting to new environments say a colony on Mars our human species may eventually diverge into two or more Or we could go the cyborg route and merge with machines Whichever option you prefer there is plenty to ponder

Becoming Human Chad Wellmon,2010-01-01 Examines the crisis of a late eighteenth century anthropology as it relates to the emergence of a modern consciousness that sees itself as condemned to draw its norms and very self understanding from itself Provided by publisher [Media Infrastructures and the Politics of Digital Time](#) Axel Volmar,Kyle Stine,2025-10-01 In a crucial sense all machines are time machines The essays in *Media Infrastructures and the Politics of Digital Time* develop the central concept of hardwired temporalities to consider how technical networks hardwire and rewire patterns of time Digital media introduce new temporal patterns in their features of instant communication synchronous collaboration intricate time management and continually improved speed They construct temporal infrastructures that affect the rhythms of lived experience and shape social relations and practices of cooperation Interdisciplinary in method and international in scope the volume draws

together insights from media and communication studies cultural studies and science and technology studies while staging an important encounter between two distinct approaches to the temporal patterning of media infrastructures a North American strain emphasizing the social and cultural experiences of lived time and a European tradition prominent especially in Germany focusing on technological time and time critical processes

Time Bettering Days and Other Essays Eugen Rosenstock-Huessy,2025-05-20 The contributions of Eugen Rosenstock Huessy 1888 1973 one of the most profound and original thinkers of the twentieth century span several disciplines in the humanities history philosophy sociology linguistics religion although his work is ultimately uncategorizable In 1933 immediately upon the ascent of Hitler he emigrated to the United States from Germany where he had been teaching at the University of Breslau In the US he was a professor at Harvard University for two years and then moved to Dartmouth College where he taught until 1957 His voice is prophetic urgent and compelling and it remains relevant This volume is a compilation of nine essays written between 1937 and 1961 all but one of them previously unpublished
