## **Bridging The Vernacular Gap Safeguarding Devices In English Romanian Translation:**

**Bridging the Vernacular Gap** Monica Augustina Zhekov, 2013-05-14 Constructing Suitable Devices for Preservation of the Young Adults English Vernacular into the Romanian Translation of Catcall is an applied research that proposes innovative linguistics devices to assist the professional in the task of translating exceptional genera which appear in children books including scientific extracts and mixtures of foreign words The findings are proposed as recommendations to translators of children s literature who are expected to make informed decisions when challenged by the new features in the genre such as Web pages word games reconstruction of imageries and much more The task of creating each one of the six devices into Romanian is tackled step by step taking into account the language particularities and cultural implications for both contexts The representation of how each device contributes toward the proper incorporation of the English vernacular element into Romanian is conducted in a suitable and careful manner taking into account relevant opinions and scholarly approaches to translating children s literature This scientific linguistic study provides innovative and effective tools for all professionals in the field

**Lexicography in Action** Monica Zhekov, 2018-01-14 The present research addresses a twofold problematic in the field of legal interpretation and translation within the United Kingdom First the study endeavours to establish linguistic equivalence between English and Romanian in the framework of UK Criminal Law Second it resolves the discontinuity between the legal systems in these two languages The objective is to examine specific lexical contextual difficulties encountered in interpretative professional practice and the availability of equivalent terminology in translation The structure and meaning of the non equivalent terms are analysed to establish equivalence by means of complex electronic queries using the collocation method The book provides a seven step model for resolving legal terminological non equivalence The model aims to empower interpreters across all languages to reach resolutions in their specific language pairs using the available resources in their professional context The study furthermore seeks to establish good practice providing relevant applications for specific contexts It develops a model of a self building glossary in easy to follow steps and with a minimum prerequisite of lexicographic knowledge or advance computing skills Finally the book offers a concise glossary for the Romanian legal interpreters and practitioners in the UK
