Best S For Entrepreneurs:

Entrepreneurship Heidi M. M. Neck, Emma L. L. Murray, Christopher P. Neck, 2024 Handbook of Competition in Banking and Finance Jacob A. Bikker, Laura Spierdijk, 2017-09-29 For academics regulators and policymaker alike it is crucial to measure financial sector competition by means of reliable well established methods However this is easier said than done The goal of this Handbook is to provide a collection of state of the art chapters to address this issue The book consists of four parts the first of which discusses the characteristics of various measures of financial sector competition The second part includes several empirical studies on the level of and trends in competition across countries The third part deals with the spillovers of market power to other sectors and the economy as a whole Finally the fourth part considers competition in banking submarkets and subsectors *Selected Works of Joseph E. Stiglitz* Joseph E. Stiglitz, 2009 The second in a series of six volumes containing a selection of Joseph Stiglitz s most important and widely cited work Volume I set out the basic concepts underlying the economics of information Volume II extends these concepts and applies them to a number of different settings in labour capital and product markets Higher Education in Regional and City Development: State of Penang, Malaysia 2011 OECD, 2011-03-29 This publication reviews higher education and economic development in the State of Penang Malaysia It analyzes how the higher education system impacts the region s economic development Start-Up Creation F. Pacheco-Torgal, Erik Stavnsager Rasmussen, Claes G. Granqvist, Volodymyr Ivanov, Arturas Kaklauskas, Stephen Makonin, 2020-05-24 Start up creation is the most distinctive feature of the entrepreneurial knowledge based economy It is also essential for economic growth and especially important in the current context of young graduate s high unemployment rates that are expected to increase in the next few decades There are other books on the creation of start up companies designed to be of value to academics wishing to exploit the commercial value of a new technology or business solution but none of these existing titles focus on start up creation in the construction industry In the second edition of this extremely successful title the editors present a state of the art review on advanced technologies and their application in several areas of the built environment covering energy efficiency structural performance air and water quality to inspire the creation of start up companies from university research Part One begins with the key factors behind successful start up companies from university research including the development of a business plan start up financing and the importance of intellectual property Part Two focuses on the use of Big Data Intelligent decision support systems the Internet of Things and their use in the energy efficiency of the built environment Finally Part three is an entire new section that focuses on several smartphone applications for the smart built environment While in the first edition the section concerning apps for smart buildings had just two chapters one for app programming basics and a second a case study on building security in this second edition the core of the book is about app development that constitutes 50% of the book Entire new section that was not available in the first edition on smart phone applications and virtual assistance for infrastructure monitoring Chapters on business plans start
