*Social Media at BBC News* Valerie Belair-Gagnon, 2015-02-11 Since the emergence of social media in the journalistic landscape the BBC has sought to produce reporting more connected to its audience while retaining its authority as a public broadcaster in crisis reporting Using empirical analysis of crisis news production at the BBC this book shows that the emergence of social media at the BBC and the need to manage this kind of material led to a new media logic in which tech savvy journalists take on a new centrality in the newsroom In this changed context the politico economic and socio cultural logic have led to a more connected newsroom involving this new breed of journalists and BBC audience This examination of news production events shows that in the midst of transformations in journalistic practices and norms including newsgathering sourcing distribution and impartiality the BBC has reasserted its authority as a public broadcaster Click here for a short video about the book

**Security Strategies and American World Order** Birthe Hansen, Peter Toft, Anders Wivel, 2008-10 This book analyses security strategies in the American world order systematically comparing Russian Middle Eastern and European policies The main finding is that the loss of relative power has decisive importance for the security strategies of states but that particular strategies can only be explained when relative power is combined with ideology and the probability of military conflict Research on the unipolar world order has focused largely on the general dynamics of the

system and the actions of the American unipole By contrast this book focuses on states that lost out relatively as a consequence of unipolarity and seeks to explain how this loss has affected their security strategies Thus in essence the book tells the other side of the story about the contemporary world order In addition it makes an important theoretical contribution by systematically coupling relative ideology and relative security with relative power and exploring their explanatory value This book will be of great interest to students of international relations security studies and foreign policy

**Imperative** Claude V. Chang,2008 Coexistence in an atmosphere of mutual respect in a pluralist world order has become an even greater challenge in the practice of international relations since the murderous acts committed by al Qaeda on September 11 2001 9 11 that demanded justice This book looks beyond today s popular narratives Dr Chang explores the extent to which the tragedy of 9 11 has been exploited by the neoconservative controlled U S administration as opportunity to launch its grand strategy for creating an American centric order necessary for the continuation of U S hegemony in the twenty first century Specific controversial concerns are extensively examined within the historical and theoretical context of territoriality and power The state of the American economy the Arab Israel conflict and the invasion of Iraq and its aftermath are treated as interrelated issues and examined in terms of the Westernization imperative inherent in the grand strategy that principally requires the containment of an emerging China
