Bc Science 10 Blm Answer:

Silvicultural Research and the Evolution of Forest Practices in the Douglas-fir Region ,2007 Silvicultural practices in the Douglas fir region evolved through a combination of formal research observation and practical experience of forest managers and silviculturists and changing economic and social factors This process began more than a century ago and still continues It has had a great influence on the economic well being of the region and on the present characteristics of the regions forests This long history is unknown to most of the public and much of it is unfamiliar to many natural resource specialists outside and even within the field of silviculture We trace the history of how we got where we are today and the contribution of silvicultural research to the evolution of forest practices We give special attention to the large body of information developed in the first half of the past century that is becoming increasingly unfamiliar to both operational foresters and perhaps more importantly to those engaged in forestry research We also discuss some current trends in silviculture and silviculture related research *General Technical Report PNW-GTR* ,2007 **Geothermal Energy** United States.
