

## SO YOU'RE IN A SPOT OF TROUBLE.

Well, you aren't the first and you won't be the last—so brace  
yourself and keep your head up—whether you're all out alone or not  
with largely cooler down by your side, your attitude and your actions.

OK, first things first: **RELAX**. Take a deep breath and keep a clear  
head. The mistake that many people make is self-induced  
nervousness or getting their priorities wrong. Think, before you act.  
The phrase I use to remind myself is **PROTECTION, RESCUE, WATER, FOOD**. These are the  
absolute basics you need to survive. And survival these basics to  
become your number one goal. So here we go—down to business.

PRIORITIES OF  
SURVIVAL

POCKET GUIDE

## PROTECTION

### CLOTHING

Clothing is your first line of defense against the  
climate. So wear or improvise appropriate  
clothing. In the cold, layers of clothing trapping  
air and warmer than just one thick garment.  
Keep your body's core warm. Headgear is  
important. And a golden rule of cold? Act before  
you get too cold. Period sweating and keep your  
clothing dry. Wet clothing can lose up to 90% of  
its insulating properties. Water conducts heat  
away from your body approximately 25 times

whether it's from the elements, direct sunlight  
or insulation. However, prioritizing insulation  
over security is a survival situation.

Faster than air of the same temperature, so  
keeping your clothes dry, over it from sweat or the  
elements, is vital.

As is hot climate, clothing and headgear may be  
your main protection from the sun. Keep skin  
covered to prevent burning. An improvised hat or  
head scarf can provide shade and keep the body  
cool at inside temp. (think sun or any fluids you  
can find—remember: survival is rarely pretty).

### SHELTER

Shelter is one of the top priorities in any  
environment. As with every element of survival,  
you must think carefully before expending  
precious energy. Don't waste time constructing  
a shelter if nature has already provided one.  
Take advantage of caves, overhangs, hollows  
and trees. In many situations, a man-made  
shelter may make a life raft, safe storage,

abandoned structures, etc. Man-made materials  
can also be scavenged for use in construction.  
Location is everything. Protection from the  
elements is the first key in a shelter. It needs  
to be stable and away from natural hazards like  
wind, rain, flooding, rock falls, animals and  
insect swarms. Study the terrain before  
choosing your shelter location.

#### Lean-To

#### A-Frame

#### Snow Pit\*

#### Tire Pit\*

\*Don't forget to add ventilation

#### Sheet Shelter

#### A Disclaimer and Warning

Should an injury, natural or otherwise  
occur, seek medical attention or personal  
aid immediately. Because many  
combinations of survival tools can  
lead to severe injury.
