Sustainable Education and Development—Clean Energy Clinton Aigbavboa, Wellington Thwala, Joseph N. Mojekwu, Lawrence Atepor, Emmanuel Adinyira, Gabriel Nani, Emmanuel Bamfo-Agyei, 2025-02-07 This book is Volume 1 of the proceedings of 2023 Sustainable Education and Development Research Conference This volume concentrates on papers in the area of clean energy Despite considerable progress more than 700 million people worldwide still lack access to electricity and around 2.4 billion people continue to use harmful and polluting fuels for cooking While efforts have been made to promote renewable energy and energy efficiency they have not been fast enough to achieve Sustainable Development Goal 7 Adding to the challenge the ongoing war in Ukraine has contributed to rising global energy prices and heightened energy insecurity in Europe In response to the energy crisis some European countries are planning to accelerate the transition to renewables and increase investments in clean energy and energy efficiency However others are considering a resurgence of coal which poses a risk to the overall green transition Between 2010 and 2020 the percentage of the global population with access to electricity increased from 83% to 91% with 1.3 billion people gaining access Nevertheless this leaves approximately 733 million people still without electricity and most of them reside in sub-Saharan Africa Achieving universal access by 2030 the annual growth rate in access needs to accelerate from 0.5 percentage points to 0.9 percentage points necessitating significant efforts in low income fragile and conflict affected countries In 2020 69% of the global population had access to clean cooking fuels and technologies While more than half of those without access to clean cooking fuels live in Asia the 20 countries with the lowest percentage of people having access to clean cooking were predominantly least developed countries in Africa The share of renewable sources in total final energy consumption reached 17.7% globally in 2019 just slightly higher than the figure for 2015 The electricity sector leads in the adoption of renewables accounting for 26.2% of total final energy consumption in 2019 while the heat and transport sectors have made limited progress Global primary energy intensity defined as global total energy supply per unit of GDP improved from 5.6 megajoules per dollar 2017 purchasing power parity in 2010 to 4.7 megajoules in 2019 However the rate of improvement 1.6% per year on average since 2015 falls short of the 3.2% annual rate needed to reach Sustainable Development Goal 7.3 International financial flows to support clean and renewable energy in developing countries reached 10.9 billion in 2019 a 23.6% decrease from 2018 This decline occurred even before the onset of the COVID-19 pandemic Over a longer five year moving average average annual commitments decreased for the first time since 2008 from 17.5 billion in 2014 to 16.6 billion in 2019 Although developing countries achieved a record of 245.7 watts per capita in installed renewable energy generating capacity in 2020 small island developing States least developed countries and landlocked developing countries have lagged behind It would take least developed countries and landlocked developing countries nearly 40 years and small island developing States almost 15 years to reach the same level of progress as the average developing country in 2020 The 2023 SEDRC conference

titled Sustainable Development and Education aims to redefine the understanding of research in the continent's development and the role of researchers. The conference focusses on applied research discussions and its dissemination. Researchers from research institutions, academicians, postgraduate students, politicians, and industry representatives will be the primary audience for the conference proceedings. Junior Graphic Mavis Kitcher (Mrs), 2011-02-23 *Felimanuel Series* Emmanuel Gbireh, 2012-10-29. It is chiefly through books that we enjoy intercourse with superior minds. In the best books, great men talk to us, give us their most precious thoughts, and pour their souls into ours. God be thanked for books. They are the voices of the distant and the dead, and make us heirs of the spiritual life of past ages. Books are true levelers. They give to all who will faithfully use them the spiritual presence of the best and greatest of our race. William Ellery Channing. Some of the things you will discover in *Felimanuel Series: The Magical Secret to Success in English Language Essay Writing for Junior and Senior High Schools Volume 1 With Bonus Success Secrets*. The book is comprehensively, logically, and coherently written, and the language used is also easy to understand; hence, little or no further explanation is needed. The book teaches how to choose examination questions and answer them without sweat. Sample outlines, plans, and sample essays have been written to guide pupils and students. The bonus success secrets will help pupils and students to pass in all seemingly difficult subjects like mathematics and science. The bonus success secrets will also guide pupils and students towards the attainment of greater success in life. The book has been designed in such a way that it can be used for examination purposes and for other practical uses in the day-to-day life of whoever uses it faithfully. In writing this book on English Language essay writing, I decided to move away from the traditional way of some authors flooding their English Language essay writing books with so many sample essays based on my experiences as an English teacher some years back. Many pupils, students, have the habit of memorizing written essays found in books and reproduce them during examinations, class exercises, or when given project home work, when they see that the question being asked is similar to the answered one they came across. I hope the experts in the educational sector will agree with me that this does not augur well for the proper development of the child, because he/she would not have the opportunity to think and plan on his/her own before writing a script with originality. I stand to be corrected if I am mistaken. It is in line with this that I have given only single sample essays per essay topic, treated with more suggested outlines, plans. Most people often fail to plan their lives, and this usually has disastrous effects on them. Also, in writing examination, most candidates fail to plan their essays before answering selected questions. As the old adage says, 'If you fail to plan, you plan to fail.' It is based on the above that in writing this book, I dedicated the first chapter to the basics of essay writing. Below is an excerpt of chapter one of the book. After highlighting on the basics of essay writing, I went ahead to discuss what paragraphs are and how they can be used in our daily writings. This is followed by the use of punctuation marks. Here again, I have given a comprehensive write-up as to how punctuation marks can be used to enrich our written works. Other topics covered in the book are writing of narrative essays, descriptive essays, friendly letters, semi-formal letters.

summary writing argumentative essays speeches and talks report writing articles for publication expository essays and advertisement After a comprehensive logical and coherent treatment of each topic I followed up with sample questions outlines plans and essays These are only to serve as a guide to users of the book I will like to take this opportunity to entreat teachers to encourage pupils students whom they teach to learn how to write an outline plan and to use it when answering essay related questions not only with English language but with all other subjects that they deem it fit to apply Some people may not see the usefulness of the outline plan but it helps the pupil stude *Daily Graphic* Ransford Tetteh,2014-03-15

Children, Childhood, and the Future Andrea Kleeberg-Niepage,2020-01-10 Although most of the world s children live in the Global South much of the corpus of scientific knowledge which forms the basis of the current notion of good childhood worldwide is drawn from research on Western middle class children Even cross cultural research often applies the Western model of childhood as the standard to which others must correspond This volume serves to bridge this gap by both bringing up significant features of the development and socialisation of children in African countries and presenting cross cultural procedures which help to discuss and develop differentiated and joint ideas about childhood instead of implementing one sided standards which are disconnected from most children s lives **Bazaar Exchange and Mart, and Journal of the Household** ,1879 **Report Series** ,1976 **Journal of the Institute of Education** ,1998 XXII Scandinavian Congress of Obstetrics and Gynecology ,1983 **American Bee Journal** ,1909 Includes summarized reports of many bee keeper associations *The Scottish Farmer* ,1921 **Pike & Fischer Radio Regulation: Cases** Henry Gold Fischer,1948 Instructor and Teacher ,1984 **Journal of Indian Psychology** ,1987 *The Bajan* ,1985 Dimensions of Early Childhood ,1998 The Listener ,1987-07 **The Illustrated London News** ,1968 **The Secrets of Professional Cartooning!** Ken Muse,1981 Hints on Literature in English with Sample Questions and Answers for Junior Secondary School Pupils ,2015 Hints on Literature in English with sample questions and answers for Junior Secondary School pupils
