involvement, this film, and others like it, have shown that viewing and discussing Hitler's "universality" tends to "minimize" these issues, obscuring the underlying issues and meaning of Hitler. Consequently, their political message is often misinterpreted. So, this article will examine and try to clarify the role of Hitler in the film, and the film's role in the broader political debate.

Automated Essay Scoring A Cross Disciplinary Perspective:

Automated Essay Scoring Mark D. Shermis, Jill C. Burstein, 2003-01-30 This new volume is the first to focus entirely on automated essay scoring and evaluation. It is intended to provide a comprehensive overview of the evolution and state of the art of automated essay scoring and evaluation technology across several disciplines including education, testing and measurement, cognitive science, computer science and computational linguistics. The development of this technology has led to many questions and concerns. Automated Essay Scoring attempts to address some of these questions including: How can automated scoring and evaluation supplement classroom instruction? How does the technology actually work? Can it improve students' writing? How reliable is the technology? How can these computing methods be used to develop evaluation tools? What are the state of the art essay evaluation technologies and automated scoring systems? Divided into four parts, the first part reviews the teaching of writing and how computers can contribute to it. Part II analyzes actual automated essay scorers, including e-rater™, IntelliMetric and the Intelligent Essay Assessor. The third part analyzes related psychometric issues and the final part reviews innovations in the field. This book is ideal for researchers and advanced students interested in automated essay scoring from the fields of testing and measurement, education, cognitive science, language and computational linguistics.

Handbook of Automated Essay Evaluation Mark D. Shermis, Jill Burstein, 2013-07-18 This comprehensive interdisciplinary handbook reviews the latest methods and technologies used in automated essay evaluation (AEE) methods and technologies. Highlights include the latest in the evaluation of performance based writing assessments and recent advances in the teaching of writing, language testing, cognitive psychology and computational linguistics. This greatly expanded follow up to *Automated Essay Scoring* reflects the numerous advances that have taken place in the field since 2003, including automated essay scoring and diagnostic feedback. Each chapter features a common structure including an introduction and a conclusion. Ideas for diagnostic and evaluative feedback are sprinkled throughout the book. Highlights of the book's coverage include: The latest research on automated essay evaluation; Descriptions of the major scoring engines, including the E-rater, the Intelligent Essay Assessor, the IntelliMetric™ Engine, c-rater™ and LightSIDE; Applications of the uses of the technology, including a large scale system used in West Virginia; A systematic framework for evaluating research and technological results; Descriptions of AEE methods that can be replicated for languages other than English, as seen in the example from China; Chapters from key researchers in the field. The book opens with an introduction to AEEs and a review of the best practices of teaching writing along with tips on the use of automated analysis in the classroom. Next, the book highlights the capabilities and applications of several scoring engines, including the E-rater, the Intelligent Essay Assessor, the IntelliMetric™ engine, c-rater™ and LightSIDE. Here readers will find an actual application of the use of an AEE in West Virginia; psychometric issues related to AEEs such as validity, reliability and scaling; and the use of automated scoring to detect reader drift, grammatical errors, discourse coherence, quality and the impact of human rating on AEEs. A review of the

cognitive foundations underlying methods used in AEE is also provided. The book concludes with a comparison of the various AEE systems and speculation about the future of the field in light of current educational policy. Ideal for educators, professionals, curriculum specialists and administrators responsible for developing writing programs or distance learning curricula, those who teach using AEE technologies, policy makers and researchers in education, writing, psychometrics, cognitive psychology and computational linguistics, this book also serves as a reference for graduate courses on automated essay evaluation taught in education, computer science, language linguistics and cognitive psychology.

Handbook of Writing Research Charles A. MacArthur, Steve Graham, Jill Fitzgerald, 2008-01-14.

Presents a collection of essays discussing the theories and models of writing research. *Handbook of Test Security* James A. Wollack, John J. Fremer, 2013-09-02. High stakes tests are the gatekeepers to many educational and professional goals. As such, the incentive to cheat is high. This Handbook is the first to offer insights from experts within the testing community, psychometricians and policymakers to identify and develop best practice guidelines for the design of test security systems for a variety of testing genres. Until now, this information was scattered and often resided inside testing companies. As a result, rather than being able to learn from each other's experiences, each testing entity was left to re-create their own test security wheel. As a whole, the book provides invaluable insight into the prevalence of cheating and best practices for designing security plans, training personnel and detecting and investigating misconduct to help develop more secure testing systems and reduce the likelihood of future security breaches. Actual case studies from a variety of settings bring to life how security systems really work. Examples from both domestic and international programs are provided. Highlights of coverage include: Best practices for designing secure tests, Analysis of security vulnerabilities for all genres of testing, Practical cheating prevention and detection strategies, Lessons learned in actual security violations in high profile testing programs. Part I focuses on how tests are delivered for paper and pencil, technology based and classroom testing and writing assessment. Each chapter addresses the prevalence of the problem and threats to security, prevention and detection. Part II addresses issues essential to maintaining a secure testing program such as planning and monitoring, physical security, the detection of group based cheating, investigating misconduct and communicating about security related issues. Part III examines actual examples of cheating, how the cheating was done, how it was detected and the lessons learned. Part III provides insight into security issues within each of the Association of Test Publishers four divisions: certification, licensure, clinical, educational and industrial organizational testing. Part III's conclusion revisits the issues addressed in the case studies and identifies common themes. Intended for organizations, professionals, educators, policy makers, researchers and advanced students that design, develop or use high stakes tests, this book is also ideal for graduate level courses on test development, educational

Machine Scoring of Student Essays Patricia Freitag Ericsson, Richard Haswell, 2006-03-15 The current trend toward machine scoring of student work Ericsson and Haswell argue has created an emerging issue with implications for higher education across the disciplines but with particular importance for those in English departments and in administration The academic community has been silent on the issue some would say excluded from it while the commercial entities who develop essay scoring software have been very active Machine Scoring of Student Essays is the first volume to seriously consider the educational mechanisms and consequences of this trend and it offers important discussions from some of the leading scholars in writing assessment Reading and evaluating student writing is a time consuming process yet it is a vital part of both student placement and coursework at post secondary institutions In recent years commercial computer evaluation programs have been developed to score student essays in both of these contexts Two year colleges have been especially drawn to these programs but four year institutions are moving to them as well because of the cost savings they promise Unfortunately to a large extent the programs have been written and institutions are installing them without attention to their instructional validity or adequacy Since the education software companies are moving so rapidly into what they perceive as a promising new market a wider discussion of machine scoring is vital if scholars hope to influence development and or implementation of the programs being created What is needed then is a critical resource to help teachers and administrators evaluate programs they might be considering and to more fully envision the instructional consequences of adopting them And this is the resource that Ericsson and Haswell are providing here Automated Essay Scoring: A Cross Disciplinary Approach M. D. Shermis & J. C. Burstein (Eds.), Assessment of Competencies in Educational Contexts Eckhard Klieme, Detlev Leutner, Johannes Hartig, 2008 Covers theoretical psychometric and practical issues related to the assessment of competencies in educational and vocational settings This book is suitable for researchers interested in theoretical and psychometric background of assessment and for readers interested in practical aspects of computer based assessment and evaluation AI Magazine, 2004 Determination of Information and Tenor in Texts Luuk Lagerwerf, 2003 Technologies in the Second Language Composition Classroom Joel Bloch, 2008 Grounded in applied linguistics research and composition theory and practice Technologies in the Second Language Composition Classroom encourages teachers to explore the role technology can play in the acquisition of writing for second language students This research based volume supports the incorporation of technology into classrooms providing students with motivation and tools to develop their writing skills The book provides not only an intellectually engaging perspective on the on going debates regarding technologically enhanced writing and writing pedagogy but it also delves in to the technologies themselves from blogs and blogging to computer mediated discourse and concordancing Technology is a growing and rapidly evolving presence in academia and Joel Bloch brings an informed approach to understanding its place and potential benefits in the classroom Each chapter includes reflection questions that will help individual readers apply the
