Math Made a Bit Easier

Lesson Plans Larry Zafran, 2010-01-19 This is the third book in the Math Made a Bit Easier series by independent math tutor Larry Zafran. It is a book of sixty lesson plans for tutors, parents, and homeschoolers. Each lesson plan includes all the components of a typical classroom lesson, such as aim, motivation, warm-up exercises, demonstrative examples, questions for thought and discussion, and connections to earlier and later material. The math content in this book is directly aligned and ideally used in conjunction with the first book of the series and its companion workbook of practice exercises. It covers the topics which comprise the foundation of math, beginning with lessons in basic arithmetic, followed by basic operations, negative numbers, fractions, decimals, percents, and basic probability and statistics. If these topics are not completely mastered, later work will prove to be quite difficult. This is especially true of algebra. The book includes a chapter on how to be an effective math tutor, as well as a chapter on how to optionally incorporate meditation instruction to help students get into a relaxed and alert state of mind, which is ideal for learning math and taking exams. Pre-Algebra, Lesson Planning Guide, 2002-05

Math for Everyone Teachers Edition Nathaniel Rock, 2007 Tired of ten-pound math textbooks. Tired of math textbooks with 700 to 1,000 pages. Math For Everyone is a curriculum designed to promote massive student and teacher math success. Assessment includes old favorites as well as authentic assessment with rubrics and grading advice included. No text is longer than 80 pages, as the 5-7 key concepts can be amply demonstrated and practiced in this amount of space. Number Sense Routines, Jessica Shumway, 2023-10-10

Following up on her best-selling book *Number Sense Routines: Building Numerical Literacy Every Day in Grades K-3*, Jessica Shumway turns her focus to upper elementary classrooms. *Number Sense Routines: Developing Mathematical Understanding Every Day in Grades 3-5* is about tapping into every child's innate number sense and providing daily connected experiences that are responsive to children's learning needs. Consistent Daily Routines: Work Adaptable to any curriculum. Shumway's 5, 10, or 15-minute warm-up routines are an easy and effective way to build and solidify students' number sense foundations as a supplement to any program. Planning and Facilitating Your Classroom: No matter how familiar the routine, Shumway provides insight on how to keep daily warm-ups fresh. She reveals careful thinking and planning that goes into each routine and offers detailed vignettes and dialogues of how they unfold in real classrooms. Assessment Strategies: As students engage in the process, each routine becomes an exciting opportunity to gain insight into where they are in their understanding and help students articulate their mathematical thinking. Identify Big Ideas: Not only will these math routines help develop students' mathematical understanding as they move towards using standard algorithms, but teachers will learn to better recognize the big ideas that emerge in discussions, how to encourage important strategies based in number sense, and how to facilitate conversations on key mathematical concepts. These routines may appear in other places, but I have never seen them written in such detail and with so many variations. Although she makes what she does
