1998, 1999, 2000, and 2001. The results show that the number of people who are employed in the private sector has increased significantly over the period 1998-2001. This is consistent with the hypothesis that the private sector is growing faster than the public sector. The results also show that the number of people who are employed in the public sector has decreased slightly over the period 1998-2001. This is consistent with the hypothesis that the public sector is growing slower than the private sector. The results also show that the number of people who are employed in the non-profit sector has increased slightly over the period 1998-2001.
