Evaluation of Science and Technology Education at the Dawn of a New Millennium James W. Altschuld,David D. Kumar,2006-04-11 James Altschuld David Kumar and their chapter authors have produced an upbeat provocative visionary and useful volume on educational evaluation Of special utility is its grounding in issues and practices relating to evaluations of science and technology education The book should appeal and be useful to a

wide range of persons involved in evaluations of educational policy programs and less so science teachers. These persons include science and technology education experts, educational policymakers, officials of the National Science Foundation, school administrators, classroom teachers, evaluation instructors, evaluation methodologists, practicing evaluators, and test developers among others. Contents reflecting international studies of curriculum, evaluation of distance education, and evaluation of technology utilization in Australian schools, as well as evaluations in America, should make the book appealing to an international audience. Moreover, it provides a global perspective for assessing and strengthening educational evaluation in the US.

Dialogic Collaborative Action Research in Science Education Allan Feldman, Jawaher Alsultan, Katie Laux, Molly Nation, 2023-08-17. This engaging and practical book offers science teacher educators and K-12 science teachers alike the tools to engage in a dialogic mode of collaborative action research. D-CAR, a collaborative mode of action research focused on teachers' experiences with students' reflection upon these experiences and peer learning. Renowned science educator Allan Feldman and co-authors from across numerous settings in K-12 science education present the theory, methodology, case studies, and practical advice to support the use of D-CAR as a means to enhance teachers' normal practice and address the problems, dilemmas, and dissonances that science teachers must negotiate as they work to meet the needs of an increasingly diverse student population and engage with complex science teaching challenges that disproportionately affect marginalized students. The book will be of use to science teacher educators, pre-service and in-service science teachers, professional development specialists, or any science educator invested in developing creative, reflective, and thoughtful teachers.
