**Urban Land Use Planning** Francis Stuart Chapin (Jr.), Edward John Kaiser, 1979      Land Use Considerations in Urban Environmental Management Janis D. Bernstein, 1994 In rapidly growing developing country cities distorted land markets and ineffective urban land management often have resulted in the degradation of environmentally fragile land occupation of hazard prone areas loss of cultural resources open space and prime agricultural land and excessive urban sprawl The paper presents the most promising land management approaches and instruments for protecting sensitive resources managing hazard prone areas protecting cultural resources conserving open space discouraging excessive urban sprawl and managing prime agricultural land Adapt du r sum de l auteur      *Land Use and Forest Resources in a Changing Environment* Gordon A. Sick Nielsen, 2013-02-05 Presently peri urbanisation is one of the most pervasive processes of land use change in Europe with strong impacts on both the environment and quality of life It is a matter of great urgency to determine strategies and tools in support of sustainable development The book synthesizes the results of PLUREL a large European Commission funded research project 2007 2010 Tools and strategies of PLUREL address main challenges of managing land use in peri urban areas These results are presented and illustrated by means of 7 case studies which are at the core of the book This volume presents a novel future oriented approach to the planning and management of peri urban areas with a main focus on scenarios and sustainability impact analysis The research is unique in that it focuses on the future by linking quantitative scenario modeling and sustainability impact analysis with qualitative and in depth analysis of regional strategies as well as including a study at European level with case study work also involving a Chinese case study      Rethinking Global Land Use in an Urban Era Karen C. Guhathakurta, 2013-06-29 This volume is the result of an invited symposium titled Integrated Land Use and Environmental Models A Survey of Current Applications and Research that was held in October 2000 at Arizona State University The idea for the symposium arose from a belief held by many academics that we are at the watershed of a new generation of models that are more dynamic more pragmatic more interdisciplinary and more amenable to collaborative decision making Several academics and professionals engaged in urban research had long realized that domain specific knowledge was inadequate for understanding and managing urban growth While interdisciplinary approaches have become critical in most social research one general area of knowledge that stands out as having the most wide ranging impact on current urban modeling efforts is the field comprised of environmental sciences and ecology The symposium offered a forum for academics and professionals engaged in urban and ecological modeling to exchange ideas and experiences specifically in areas that overlapped urban and environmental issues The contributions to this volume highlight the progress made in the various efforts to build integrated urban and environmental models More importantly each chapter shows how ideas have diffused across disciplinary boundaries to create better policy relevant models In addition this book outlines some promising areas of research that could make important contributions to the field of urban and environmental modeling Integrated thinking about urban and environmental issues has been fundamental to the concept of sustainability Land Use Change and Environmental Quality
