Land Use McGraw Hill Series In Forest Resources:

Forests and Rural Development Jürgen Pretzsch, Dietrich Darr, Holm Ubrig, Eckhard Auch, 2014-01-21 This book provides an overview of the complex challenges and opportunities related to forest based rural development in the tropics and subtropics. Applying a socio ecological perspective the book traces the changing paradigms of forestry in rural development throughout history. It summarizes the major aspects of the rural development challenge in forest areas and documents innovative approaches in fields such as land utilization technology and organizational development, rural advisory services, financing mechanisms, participative planning and forest governance. It brings together scholars and practitioners dealing with the topics from various theoretical and practical angles. Calling for an approach that carefully balances market forces with government intervention, the book shows that forests in rural areas have the potential to provide a solid foundation for a green global economy.

Rural Planning in Developing Countries Barry Dalal-Clayton, David Dent, Olivier Dubois, 2013-06-17 This book provides an international perspective on rural planning focused on developing countries. It examines conventional development planning and innovative local planning approaches, drawing together lessons from recent experience of rural planning and land use. The authors examine past and current practice and ways that land use planning and management of natural resources can underpin sustainable local livelihoods. They draw on case studies from Africa, Asia and Latin America to present findings relevant throughout the developing world.

Introduction to Forest and Renewable Resources Grant William Sharpe, 1995 This new re-titled formerly Sharpe Hendee Introduction to Forestry text embraces changes in policies and practices related to the conservation and management of forests and other renewable resources in the U.S. and beyond. Now in a paperback format, Sharpe et al. features an expanded photograph program, study questions at the end of each chapter and more information on ecosystem management and the new forestry. There are also new chapters on watershed management, recreation and wildlife and range management. As in previous editions, the text features a broad coverage of the forestry enterprise plus a comprehensive index and useful appendixes.

Effects of climate change on the profitability of carbon credit sales Nina Becker, 2010-09-01 Nina Becker's research provides a thorough analysis of the economics of carbon sequestration from an interdisciplinary perspective on the impacts of climate change on forest resources. The analysis is based on an integrated assessment that links a climate yield model with a profitability analysis. In specific Nina Becker investigates tree productivity under global and regional climate change scenarios. Furthermore she demonstrates the potential effects of increasing tree productivity on the profitability of carbon credit sales. For this purpose she conducted a case study on teak *Tectona grandis* L f plantations on the Pacific Coast of Costa Rica. Nina Becker points out the potential of and future challenges for forest plantations in mitigating climate change. The book is aimed at scholars as well as NGOs and policymakers with an interest in forests and climate change. **Library of Congress Catalogs** Library of Congress, 1977 Pamphlets on Forest Management, 1916 **Subject Catalog** Library of Congress, 1979 The Forest Resource in the European Community Massimo Florio, 1987 **Catalogue** Harvard University.
