## **Advancing Digital Humanities Research Methods Theories:**

**Advancing Digital Humanities** P. Arthur, K. Bode, 2014-12-03 Advancing Digital Humanities moves beyond definition of this dynamic and fast growing field to show how its arguments analyses findings and theories are pioneering new directions in the humanities globally **Research Methods for Creating and Curating Data in the Digital Humanities** Gabriele Griffin, Matt Hayler, 2016-05-31 The first volume to focus on digitising and curating data online as research methods for Digital Humanities As all scholars increasingly use digital tools to support their research and every internet user becomes used to data being available elucidating and engaging the creative aspects of Digital Humanities work are coming under increasing scrutiny This volume explores the practice of making new tools new images new collections and new artworks in an academic environment detailing who needs to be involved and what their roles might be and how they come together to produce knowledge as a collective The chapters presented here demonstrate that creation is never neutral with political and theoretical concerns intentionally or unavoidably always being written into the fabric of what is being made even if that's the seeming neatness of computer code In presenting their own creative research the writers in this volume offer examples of practice that will be of use to anyone interested in learning more about contemporary Digital Humanities scholarship and its implications Key features First volume to explore digitisation practices as research methods for Humanities scholars Provides a practical and critical approach to issues of digitisation Discusses actual digitisation projects on a how to basis Addresses issues such as digital photography multi spectral imaging rekeying metadata online simulation artistic practice online

**Handbook of Research on Advanced Research Methodologies for a Digital Society** Punziano, Gabriella, Delli Paoli, Angela, 2021-09-03 Doing research is an ever changing challenge for social scientists This challenge is harder than ever today as current societies are changing quickly and in many sometimes conflicting directions Social phenomena personal interactions and formal and informal relationships are becoming more borderless and disconnected from the anchors of the offline reality These dynamics are heavily marking our time and are suggesting evolutionary challenges in the ways we know interpret and analyze the world Internet and computer mediated communication CMC is being incorporated into every aspect of daily life and social life has been deeply penetrated by the internet This is due to recent technological developments that increase the scope and range of online social spaces and the forms and time of participation such as Web 2.0 which widened the opportunities for user generated content the emergence of an internet of things and of ubiquitous mobile devices that make it possible to always be connected This implies an adjustment to epistemological and methodological stances for conducting social research and an adaption of traditional social research methods to the specificities of online interactions in the digital society The Handbook of Research on Advanced Research Methodologies for a Digital Society covers the different strands of methods most affected by the change in a digital society and develops a broader theoretical reflection on the future of social research in its challenge to always be fitting suitable adaptable and pertinent to the society to be studied The

chapters are geared towards unlocking the future frontiers and potential for social research in the digital society. They include theoretical epistemological and ontological reflections about the digital research methods as well as innovative methods and tools to collect, analyze and interpret data. This book is ideal for social scientists, practitioners, librarians, researchers, academicians and students interested in social research methodology and its developments in the digital scenario.

**Digital Humanities and Laboratories** Urszula Pawlicka-Deger, Christopher Thomson, 2023-11-09

Digital Humanities and Laboratories explores laboratories dedicated to the study of digital humanities DH in a global context and contributes to the expanding body of knowledge about situated DH knowledge production. Including a foreword by David Berry and contributions from a diverse international range of scholars and practitioners this volume examines the ways laboratories of all kinds contribute to digital research and pedagogy. Acknowledging that they are emerging amid varied cultural and scientific traditions the volume considers how they lead to the specification of digital humanities and how a locally situated knowledge production is embedded in the global infrastructure system. As a whole the book consolidates the discussion on the role of the laboratory in DH and brings digital humanists into the interdisciplinary debate concerning the notion of a laboratory as a critical site in the generation of experimental knowledge. Positioning the discussion in relation to ongoing debates in DH the volume argues that laboratory studies are in an excellent position to capitalize on the theories and knowledge developed in the DH field and open up new research inquiries. Digital Humanities and Laboratories clearly demonstrates that the laboratory is a key site for theoretical and critical analyses of digital humanities and will thus be of interest to scholars, students and practitioners engaged in the study of DH culture, media, heritage and infrastructure.

**Digital and Traditional Epigraphy in Context** Silvia Orlandi, Raffaella Santucci, Francesco Mambrini, Pietro Maria Liuzzo, 2017-07-01

**The Datafied Society** Mirko Tobias Schäfer, Karin Es, 2025-10-01

As machine readable data comes to play an increasingly important role in everyday life researchers find themselves with rich resources for studying society. The novel methods and tools needed to work with such data require not only new knowledge and skills but also a new way of thinking about best research practices. This book critically reflects on the role and usefulness of big data challenging overly optimistic expectations about what such information can reveal introducing practices and methods for its analysis and visualisation and raising important political and ethical questions regarding its collection, handling and presentation.

**The Big Humanities** Richard Lane, 2016-11-25

This book provides an accessible introduction to and overview of the digital humanities one of the fastest growing areas of literary studies. Lane takes a unique approach by focusing on the technologies and the new environment in which the digital humanities largely takes place the digital laboratory. The book provides a brief history of DH explores and explains the methodologies of past and current DH projects and offers resources such as detailed case studies.

and bibliographies Further the focus on the digital laboratory space reveals affiliations with the types of research that have traditionally taken place in the sciences as well as convergences with other fast growing research spaces namely innovation labs fabrication labs maker spaces digital media labs and change labs The volume highlights the profound transformation of literary studies that is underway one in which the adoption of powerful technology and concomitantly being situated within a laboratory environment is leading to an important re engagement in the arts and humanities and a renewed understanding of literary studies in the digital age as well as a return to large scale financial investment in humanistic research It will be useful to students and teachers as well as administrators and managers in charge of research infrastructure and funding decisions who need an accessible overview of this technological transformation in the humanities Combining useful detail and an overview of the field the book will offer accessible entry into this rapidly growing field

#### *Digital Cultural Heritage*

Horst Kremers,2019-06-21 This book provides an overview of various application spheres and supports further innovations needed in information management and in the processes of knowledge generation The professions organizations and scientific associations involved are unusually challenged by the complexity of the data situation Cartography has always been the central field of application for georeferencing digital cultural heritage DCH objects It is particularly important in enabling spatial relation analysis between any number of DCH objects or of their granular details In addition to the pure geometric aspects the cognitive relations that lead to knowledge representation and derivation of innovative use processes are also of increasing importance Further there is a societal demand for spatial reference and analytics e g the extensive use of cognitive concepts of map and atlas for a variety of social topics in the media There is a huge geometrical logical cognitive potential for complex multimedia digital cultural heritage databases and stakeholders expect handling transmission and processing operations with guaranteed long term availability for all other stakeholders In the future whole areas of digital multimedia databases will need to be processed to further our understanding of historical and cultural contexts This is an important concern for the information society and presents significant challenges for cartography in all these domains This book collects innovative technical and scientific work on the entire process of object digitization including detail extraction archiving and interoperability of multimedia DCH data
