Mapping in the Cloud Michael P. Peterson, 2014-03-19 This engaging text provides a solid introduction to mapmaking in the era of cloud computing. It takes students through both the concepts and technology of modern cartography, geographic information systems, GIS, and Web-based mapping. Conceptual chapters delve into the meaning of maps and how they are developed, covering such topics as map layers, GIS tools, mobile mapping, and map animation. Methods chapters take a learn-by-doing approach to help students master application programming interfaces and build other technical skills for creating maps and making them available on the Internet. The companion website offers invaluable supplementary materials for instructors and students. Pedagogical Features: End of chapter summaries, review questions, and exercises. Extensive graphics illustrating the concepts and procedures. Downloadable PowerPoints for each chapter. Downloadable code files where applicable for the exercises.

Geoinformatics in Theory and Practice Norbert de Lange, 2023-06-23 This textbook is intended to display a broad methodological introduction to geoinformatics and geoinformation science. It deals with the recording, modeling, processing, and analysis, as well as presenting and distributing of geodata. As an integrated approach, it is dedicated to the multidisciplinary application of methods and concepts of computer science to solve spatial tasks. First, the reader receives an introduction to the approach and tasks of geoinformatics, basic concepts, and general principles of information processing, as well as essentials of computer science. Then, this textbook focuses on the following topics: spatial reference systems, digital spatial data, interoperability of spatial data, visualization of spatial information, data organization, and database systems, geoinformation systems, remote sensing, and digital image processing. The result is a comprehensive manual for studies and practical applications in geoinformatics. It serves also as a basis to support and deepen methodological courses in geography, geology, geodesy, and surveying, as well as all environmental sciences. In this first English edition, the author has updated and significantly expanded the fourth German edition. New additions include the development of apps, graphical presentation on the web, geodata bases, and recent methods of classification. This book is based on the original German 4th edition *Geoinformatik in Theorie und Praxis* by Norbert de Lange, published by Springer Verlag GmbH, Germany, part of Springer Nature, in 2020, and still presents the only integrated perspective on geoinformatics and geoinformation science. This book was translated with the help of artificial intelligence machine translation by the service DeepL.com, first, and then significantly revised with regard to technical terms and special topics of geoinformatics.
