 - What are each of the levels of organization? Recognize which levels are made up of cells? Individuals?
 - Cells, tissues, organs, organ systems, organisms, populations, communities, ecosystems, biomes
 - Describe the differences between a population, community, and ecosystem.
 - Population: group of individuals belonging to the same species in a given area
 - Community: consists of all populations of all species in a given area
 - Ecosystem: a community interacting with its environment through energy transfer
- Describe the underlying characteristics that unite all living things:
 - What are the major principles of living things?
 - All living things require energy inputs for energy and matter
 - All living things sense and respond to change (homeostasis)
 - All living things use DNA as the carrier of genetic information
 - What is the difference between a producer and a consumer?
