

The background of the book cover is a vibrant underwater photograph of a coral reef. The water is a clear, deep blue, and the coral is a mix of green, yellow, and brown. Numerous small, silvery fish are swimming around the coral. The overall scene is bright and lively, representing a rich biodiversity.

Biodiversity Hotspots Distribution And Protection Of Conservation Priority Areas:

Biodiversity Hotspots Frank E. Zachos, Jan Christian Habel, 2011-09-15 Biodiversity and its conservation are among the main global topics in science and politics and perhaps the major challenge for the present and coming generations This book written by international experts from different disciplines comprises general chapters on diversity and its measurement human impacts on biodiversity hotspots on a global scale human diversity itself and various geographic regions exhibiting high levels of diversity The areas covered range from genetics and taxonomy to evolutionary biology biogeography and the social sciences In addition to the classic hotspots in the tropics the book also highlights various other ecosystems harbouring unique species communities including coral reefs and the Southern Ocean The approach taken considers but is not limited to the original hotspot definition *sensu stricto* and presents a chapter introducing the 35th hotspot the forests of East Australia While due to a bias in data availability the majority of contributions on particular taxa deal with vertebrates and plants some also deal with the less studied invertebrates This book will be essential reading for anyone involved with biodiversity particularly researchers and practitioners in the fields of conservation biology ecology and evolution

Protected Area Governance and Management Graeme L. Worboys, Michael Lockwood, Ashish Kothari, Sue Feary, Ian Pulsford, 2015-04-08 Protected Area Governance and Management presents a compendium of original text case studies and examples from across the world by drawing on the literature and on the knowledge and experience of those involved in protected areas The book synthesises current knowledge and cutting edge thinking from the diverse branches of practice and learning relevant to protected area governance and management It is intended as an investment in the skills and competencies of people and consequently the effective governance and management of protected areas for which they are responsible now and into the future The global success of the protected area concept lies in its shared vision to protect natural and cultural heritage for the long term and organisations such as International Union for the Conservation of Nature are a unifying force in this regard Nonetheless protected areas are a socio political phenomenon and the ways that nations understand govern and manage them is always open to contest and debate The book aims to enlighten educate and above all to challenge readers to think deeply about protected areas their future and their past as well as their present The book has been compiled by 169 authors and deals with all aspects of protected area governance and management It provides information to support capacity development training of protected area field officers managers in charge and executive level managers

Never Again Andrea Gaynor, Peter Newman, Philip Jennings, 2018 The lead up to the 2017 Western Australian state election saw a large and lively protest over the construction of stage 8 of the Roe Highway Roe 8 and the Perth Freight Link Years of opposition to Roe 8 culminated in civil disobedience mass arrests and media theatrics as the bulldozers tore across Aboriginal heritage sites and through much loved bushland and wetland just weeks out from an election the government appeared likely to lose When Labor was swept to power in the biggest landslide victory ever delivered by Western Australian voters the Roe 8

contracts were cancelled However the planning systems that enabled Roe 8 and the Perth Freight Link remain in place and in need of reform This book illuminates what was at stake in the conflict for Perth residents Aboriginal heritage and the environment It traces the history of Roe 8 and the Perth Freight Link to show what needs to be done in order to ensure that Western Australian people and environments never again have such a damaging project thrust upon them It surveys the issues and makes recommendations across transport planning environment health and Aboriginal heritage policy areas It also captures the nature of the diverse and vigorous resistance to the project setting the struggle and its bittersweet victory in a wider context Subject Environmental Studies Australian Studies Aboriginal Studies **Encyclopedia of the**
