*Biofilm Eradication and Prevention* Tamilvanan Shunmugaperumal, 2010-12-28 Biofilm Eradication and Preventions presents the basics of biofilm formation on medical devices diseases related to this formation and approaches pharmaceutical researchers need to take to limit this problem Split into three parts the first deals with the development and characterization of biofilm on the surfaces of implanted or inserted medical devices Questions as to why biofilms form over medical device surfaces and what triggers biofilm formation are addressed In the second section the author discusses biofilm mediated chronic infections occurred in various organs eyes mouth wounds and pharmaceutical and drug delivery knowledge gained from research in these area The third part explores pharmaceutical approaches like lipid and polymer based drug delivery carriers for eradicating biofilm on device related infections In addition this section also explores the topic of novel small molecule like iron and its complexes metal chelators and a quorum sensing inhibitors to control medical biofilm formation

**Microbial Growth in Biofilms** Ronald J. Doyle, 2001 This volume and its companion Volume 337 supplement Volume 310 These volumes provide a contemporary sourcebook for virtually any kind of experimental approach involving biofilms They cover bioengineering molecular genetic microscopic chemical and physical methods

### **Medical Biofilms** Jana

Jass, Susanne Surman, James Walker, 2003-04-02 Biofilms are formed by microorganisms growing on surfaces and comprise a series of microcolonies interspersed with spaces through which fluids and other microorganisms move In medicine the primary problems are biofilms associated with implants infections are increasingly difficult to treat with traditional antibiotics and removal of the implant often becomes essential frequently leading to higher morbidity and mortality This will be the first book dedicated to medical biofilms It will cover much recent information on the problems of biofilms how to detect them and how to control their presence

**Biofilms**, 1999-10-27 Volume 310 of Methods in Enzymology is the first

volume devoted solely to biofilm research methods It provides a contemporary source book for virtually any kind of experimental approach involving biofilms It includes bioengineering molecular genetic microscopic chemical continuous culture and physical methods This volume will serve as a starting point for future developments The critically acclaimed laboratory standard for more than forty years Methods in Enzymology is one of the most highly respected publications in the field of biochemistry Since 1955 each volume has been eagerly awaited frequently consulted and praised by researchers and reviewers alike Now with more than 300 volumes all of them still in print the series contains much material still relevant today truly an essential publication for researchers in all fields of life sciences
