from Shakespeare to Bernini Throughout Ovid's poetry is revealed as enduringly scintillating his personal story compelling and the issues his life and poetry raise of continuing relevance and interest

Galileo Stillman Drake, 2001-02-22 In a startling reinterpretation of the evidence Stillman Drake advances the hypothesis that Galileo's trial and condemnation by the Inquisition was caused not by his defiance of the Church but by the hostility of contemporary philosophers Galileo's own beautifully lucid arguments are used to show how his scientific method was utterly divorced from the Aristotelian approach to physics in that it was based on a search not for causes but for laws Galileo's method was of overwhelming significance for the development of modern physics and led to a final parting of the ways between science and philosophy

Ten Days in Physics that Shook the World Brian Clegg, 2021-08-05 The breakthroughs that have had the most transformative practical impacts from thermodynamics to the Internet Physics informs our understanding of how the world works but more than that key breakthroughs in physics have transformed everyday life We journey back to ten separate days in history to understand how particular breakthroughs were achieved meet the individuals responsible and see how each breakthrough has influenced our lives It is a unique selection Focusing on practical impact means there is no room for Stephen Hawking's work on black holes or the discovery of the Higgs boson Instead we have the relatively little known Rudolf Clausius thermodynamics and Heike Kamerlingh Onnes superconductivity while Albert Einstein is included not for his theories of relativity but for the short paper that gave us $E=mc^2$ nuclear fission Later chapters feature transistors LEDs and the Internet

Alexander the Great Hugh Bowden, 2014-07-24 Alexander the Great became king of Macedon in 336 BC

when he was only 20 years old and died at the age of 32 twelve years later During his reign he conquered the Achaemenid Persian Empire the largest empire that had ever existed leading his army from Greece to Pakistan and from the Libyan desert to the steppes of Central Asia His meteoric career as leader of an alliance of Greek cities Pharaoh of Egypt and King of Persia had a profound effect on the world he moved through Even in his lifetime his achievements became legendary and in the centuries that following his story was told and retold throughout Europe and the East Greek became the language of power in the Eastern Mediterranean and much of the Near East as powerful Macedonian dynasts carved up Alexander's empire into kingdoms of their own underlaying the flourishing Hellenistic civilization that emerged after his death But what do we really know about Alexander In this Very Short Introduction Hugh Bowden goes behind the usual historical accounts of Alexander's life and career Instead he focuses on the evidence from Alexander's own time letters from officials in Afghanistan Babylonian diaries records from Egyptian temples to try and understand how Alexander appeared to those who encountered him In doing so he also demonstrates the profound influence the legends of his life have had on our historical understanding and the controversy they continue to generate worldwide ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

arguably France's best known literary writer. He wrote stories, essays, translations, and a 3,000-page novel *In Search of Lost Time* (1913-27). This book is a brief guide to Proust's magnum opus in which Joshua Landy invites the reader to view the novel as a single quest: a quest for purpose, enchantment, identity, connection, and belonging through the novel's fascinating treatments of memory, society, art, same-sex desire, knowledge, self-understanding, self-fashioning, and the unconscious mind.

Nietzsche: A Very Short Introduction Michael Tanner, 2000-10-19. The philosophy of Friedrich Nietzsche (1844-1900) was almost wholly neglected during his sane life, which came to an abrupt end in 1889. Since then, he has been appropriated as an icon by an astonishingly diverse spectrum of people whose interpretations of his thought range from the highly irrational to the firmly analytical. Thus, Spoke Zarathustra introduced the Superman, and *The Twilight of the Idols* developed the Will to Power concept. These terms, together with *Sklavenmoral* and *Herrenmoral*, became confused with the rise of nationalism in Germany. Idiosyncratic and aphoristic, Nietzsche is always bracing and provocative and temptingly easy to dip into. Michael Tanner's readable introduction to the philosopher's life and work examines the numerous ambiguities inherent in his writings. It also explodes the many misconceptions fostered in the hundred years since Nietzsche wrote prophetically: "Do not above all confound me with what I am not." Imperialism and Colonialism Alan Macfarlane, 2022-03-23. *Imperialism and Colonialism* Christopher Bayly, Richard Rathbone, and Richard Drayton is a collection of interviews that are being published as a book for the first time. These interviews have been conducted by one of England's leading social anthropologists and historians, Professor Alan Macfarlane. Filmed over a period of several years, the three conversations in this volume are part of the series *Creative Lives and Works*. These transcriptions form a part of a larger set of interviews that cut across various disciplines from the social sciences and the sciences to the performing and visual arts. The current volume is on three foremost imperial and global historians. Colonialism is intrinsically linked to its imperial past. Christopher Bayly, Richard Rathbone, and Richard Drayton come alive through these conversations in this book. They offer a refreshing perspective to the actions of the colonizer and the colonized, often deriding the actions of the former. Bayly talks at great length about his Indian experience. Rathbone talks about the tempered indifference of the larger academic community towards African history and its oral tradition, and Drayton engages his readers with anecdotes and interesting insights into Creole culture. The book will be of enormous value not just to those interested in the subject of History, Culture Studies, Ethnography, and Comparative Studies and Literature, but also to the uninitiated because of the lucidity which conversations bring to even otherwise opaque discussions. Please note: This title is co-published with Social Science Press, New Delhi. Taylor Francis does not sell or distribute the hardback in India, Pakistan, Nepal, Bhutan, Bangladesh, and Sri Lanka.
