

10.1. The 1000 Genomes Project

10.1.1. The 1000 Genomes Project

Question	Answer
What is the 1000 Genomes Project?	The 1000 Genomes Project is a large-scale genomics project that aims to create a comprehensive reference database of human genetic variation.
What is the goal of the project?	The goal of the project is to identify and catalog all common and rare genetic variants across the human genome.
What are the main findings of the project?	The project has identified over 84 million common variants and over 100 million rare variants across the human genome.
What are the implications of the project?	The project has provided a valuable resource for researchers studying human genetics and disease.
What are the next steps?	The project is ongoing, and researchers are working to identify even more variants and study their effects on human health.

Researchers have discovered that the human genome is more complex than we thought.

They have found many more variants than we knew about. And they have found that some variants are more common than others.

Researchers have also found that some variants are associated with disease. This means that some people are more likely to get sick than others. And this is because of the way their genes are written.
