3. Incentive and observation theory (3): incentives are popular because incentives are proven to increase work performance. Incentives can result in higher performance because they reward individuals and reinforce performance and behavior (see [Kreps and Wilson, 1982](#)).

• **Microscopic examination:** This method should prove easier than bacteriological testing provided there is no gross pathological material. If gross material is used, the bacteria may interfere with the stain, so it is essential that the specimen be taken from a clean, non-contaminated area. If necessary, the sample may be stained with a haemocytometer. Microscopic examination for amoebae is best carried out by examining mucous specimens.

indicates that these corresponding constants are independent from the form of solution and the form of the corresponding basis vector. For example, if the solution of the same basis vector is represented in two ways and resulting in many key parameters the corresponding parameters representing the two representations are independent from each other. This, however, is not always the case. In general, the parameters are dependent on the form of the solution.

2. Identify and describe the 100 best oilseed varieties. Give an example of how each oilseed is used, and what it is used for.

• Students and teachers have much more freedom to work with the job. They can make choices between activities, difficult and easy, and can have more time for leisure. Students of this society are more creative, more receptive to innovation, and more flexible than will most citizens of a society. If you are a teacher, then you
