

BTEQ

Batch **T**eradata **Q**uery (BTEQ) is pronounced Bee-Teeeeek.

BTEQ was the first utility and query tool for Teradata. BTEQ can be used as a Query tool, to load data a row at a time into Teradata and to export data off of Teradata a row at a time.

The features of BTEQ:

- BTEQ can be used to submit SQL in either a batch or interactive environment.
 - o Fields
 - o Space
 - o Excel
 - o Canon camera reviews
 - o Contact
 - o Fan
 - o Article
- BTEQ gives the outputs in a report format, where Queryman outputs data in a format more like a spreadsheet.
- As said Bteq is an excellent tool for importing and exporting data.

There are mainly 4 types of BTEQ Exports.

Export DATA

This is set by .EXPORT DATA.

Generally, users will export data to a flat file format. This is called Record Mode or DATA mode.

If the data has no headers or white space between the data contained in each column and the data is written to the file in a normal format.

Export INDICDATA

This is set by .EXPORT INDICDATA.

This mode is used to export data with extra indicator bytes to indicate NULLs in column for a row.

Export REPORT

This is set by .EXPORT REPORT
