Christian Science Sentinel, 1905 **Iran's Networks of Influence in the Middle East** The International Institute for Strategic Studies (IISS), 2020-03-31 Tehran's ability to fight by with and through third parties in foreign jurisdictions has become a valuable and effective sovereign capability that gives Iran strategic advantage in the region. Tehran has possessed a form of this capability since the Islamic Revolution in 1979 but its potency and significance have risen sharply in the past decade to the point where it has brought Iran more regional influence and status than either its nuclear or ballistic missile programmes. The IISS Strategic Dossier Iran's Networks of Influence provides an understanding of how Iran builds, operates and uses this capability. Based on original field research, open source information and interviews with a range of sources, the dossier conducts an audit of Iran's activities in the principal regional theatres of Iraq, Lebanon, Syria and Yemen and its reach into Bahrain, Saudi Arabia and Kuwait. It includes an examination of Tehran's nurturing of groups such as the Houthis in Yemen, the Badr Organisation in Iraq, Hizbullah in Lebanon and Shia militias in Syria and details related to recruitment, weapons supply, logistics and command and control systems. Iran's Networks of Influence is intended through objective fact-based analysis to inform both policymakers and practitioners and to stimulate debate on the wider significance of Iran's use of third party partners and the strategic depth they afford Tehran. The dossier also examines the advantages that Iran possesses through its recent experience of conflict and its ability to mobilise and deploy sympathetic Shia communities across theatres. In a time of rising tension in the region, the dossier looks at how Iran might further develop the use of its partnership capability and the risks and constraints it might face.

Routledge Companion to Intelligence Studies

Robert Dover, Michael S. Goodman, Claudia Hillebrand, 2013-09-05 The Routledge Companion to Intelligence Studies provides a broad overview of the growing field of intelligence studies. The recent growth of interest in intelligence and security studies has led to an increased demand for popular depictions of intelligence and reference works to explain the architecture and underpinnings of intelligence activity. Divided into five comprehensive sections, this Companion provides a strong survey of the cutting edge research in the field of intelligence studies. Part I: The evolution of intelligence studies. Part II: Abstract approaches to intelligence. Part III: Historical approaches to intelligence. Part IV: Systems of intelligence. Part V: Contemporary challenges. With a broad focus on the origins, practices and nature of intelligence, the book not only addresses classical issues but also examines topics of recent interest in security studies. The overarching aim is to reveal the rich tapestry of intelligence studies in both a sophisticated and accessible way. This Companion will be essential reading for students of intelligence studies and strategic studies and highly recommended for students of defence studies, foreign policy, Cold War studies, diplomacy and international relations in general.
