Managing the Commons John A. Baden, Douglas S. Noonan, 2017-08-15 Managing natural resources that are held in common is a great and grave challenge It requires addressing the community of users beneficiaries and managers It also requires consideration of how those communities interact with the commons itself At stake is the prosperity and even survival of both the people and the environment Understanding and improving how we relate to commons has been the focus of much scholarly and practical research in the last 30 years A quick look at the various natural resource commons surrounding us indicates that this will no doubt continue Pacific Northwest salmon fisheries represent a system of commons both complex and illustrative My past history as administrator of the US Environmental Protection Agency and my fisherman's interest in salmon has heightened my sensitivity to the plight of the salmon and the people whose lives they affect Recently my wife and I moved back to the Pacific Northwest something the salmon try to do every year as they live out their inspiring life cycles Unlike us the salmon do not always find a hospitable environment when they return There are many reasons Simply put there are more people in the salmon's way and they struggle more with the problems that come with expanding human populations A number of reports issued over the past few years have chronicled the broad declines and local extinction of many salmon steelhead and sea run cutthroat stocks in the region The people who fish for a living and the communities in which they live have been hit hard Our resource agencies are in danger of being overwhelmed by the complexity and magnitude of the problem Why are salmon faring so poorly Who is responsible What can be done to reverse the recent declines in salmon populations When tragedy befalls a commons as it has the salmon I come to no conclusion about who is at fault and I don't intend to The one thing that I am certain of is that the only truly innocent parties in all of this are the salmon and the generations of people yet to come It seems to me that the responsibility falls upon all of us

fishermen resource managers and concerned citizens alike to take the steps necessary to ensure that salmon populations recover to the point that our children will be able to enjoy the quality of life we once took for granted While many people focus on how to get the most from commons groups like the Sustainable Fisheries Foundation emphasize providing and maintaining those natural resources Their goal is deceptively simple We are trying to put more salmon back in the rivers and lakes of the Pacific Northwest Determining exactly how to accomplish this goal has defied the efforts of a great many dedicated and talented people Many papers and panel discussions especially reports on the status and trend of wild salmon populations in the North Pacific make it clear that many salmon stocks in parts of the lower United States southern British Columbia and the west coast of Vancouver Island are not faring well The decline in salmon numbers in these areas corresponds with a rapidly expanding human population alterations in land and water use increasing sediment and containment loads and heavy fishing pressure by a combination of sport commercial and tribal groups

Managing the Commons, Second Edition

John A. Baden,Douglas S. Noonan,1998-04-22 Garrett Hardin's seminal essay The Tragedy of the Commons appeared in 1968 and has been at the center of the debate on commonly owned ground or resources such as Western public grazing or the oceans This is the second edition of a book exploring the issues raised in Hardin's essay As scarce resources are increasingly strained It is ever more crucial to identify those resources which are held in common and are therefore prone to tragic waste and abuses The essay in this volume focus on alternate institutional approaches to managing these resources to prevent such tragedy

Page 4 of cover *The Political Economy of Customs and Culture* Terry L. Anderson,Randy T. Simmons,1993-03-16 Since the writings of Adam Smith economists have understood the important role that private property rights play in a well functioning economic system Without well defined enforced and transferable property rights the tragedy of the commons is said to result as in the classic case of over fishing and over grazing This book challenges this narrow view of property rights by examining the role of informal constraints imposed by customs and culture Recognizing that a great deal of human interaction takes place in the absence of individually specified rights the authors challenge the notion that tragedy is inevitable within the commons
