**Biology** Wallace,1998-03-21      *Advanced Pre-Med Studies Parent Lesson Plan* ,2013-08-01 Advanced Pre Med Studies  
Course Description Semester 1 From surgery to vaccines man has made great strides in the field of medicine Quality of life  
has improved dramatically in the last few decades alone and the future is bright But students must not forget that God  
provided humans with minds and resources to bring about these advances A biblical perspective of healing and the use of  
medicine provides the best foundation for treating diseases and injury In *Exploring the History of Medicine* author John  
Hudson Tiner reveals the spectacular discoveries that started with men and women who used their abilities to better  
mankind and give glory to God The fascinating history of medicine comes alive in this book providing students with a healthy  
dose of facts mini biographies and vintage illustrations It seems that a new and more terrible disease is touted on the news  
almost daily The spread of these scary diseases from bird flu to SARS to AIDS is a cause for concern and leads to questions  
such as Where did all these germs come from and how do they fit into a biblical world view What kind of function did these  
microbes have before the Fall Does antibiotic resistance in bacteria prove evolution How can something so small have such a  
huge deadly impact on the world around us Professor Alan Gillen sheds light on these and many other questions in *The  
Genesis of Germs* He shows how these constantly mutating diseases are proof for devolution rather than evolution and how  
all of these germs fit into a biblical world view Dr Gillen shows how germs are symptomatic of the literal Fall and Curse of  
creation as a result of man s sin and the hope we have in the coming of Jesus Christ Semester 2 *Body by Design* defines the  
basic anatomy and physiology in each of 11 body systems from a creationist viewpoint Every chapter explores the wonder  
beauty and creation of the human body giving evidence for creation while exposing faulty evolutionist reasoning Special  
explorations into each body system look closely at disease aspects current events and discoveries while profiling the classic  
and contemporary scientists and physicians who have made remarkable breakthroughs in studies of the different areas of the  
human body Within *Building Blocks in Life Science* you will discover exceptional insights and clarity to patterns of order in  
living things including the promise of healing and new birth in Christ Study numerous ways to refute the evolutionary  
worldview that life simply evolved by chance over millions of years The evolutionary worldview can be found filtered through  
every topic at every age level in our society It has become the overwhelmingly accepted paradigm for the origins of life as  
taught in all secular institutions This dynamic education resource helps young people not only learn science from a biblical  
perspective but also helps them know how to defend their faith in the process      **Carolina Science and Math** Carolina
