Business Analytics: Step-by-Step Tutorial Narcyz Roztocki, 2016-11-05 Business Analytics refers to utilizing existing data to make business decisions. Often, however, the decision makers lack the knowledge and skill to process the existing documents and retrieve information that is useful for their decision making. The objective of this tutorial is to improve basic skills on how to process existing data by providing a collection of simplified but realistic hands-on examples. In essence, this tutorial is a collection of business mini cases. It starts with relatively simple cases and then progresses step by step by adding complexity to each of the following business cases. Its intent is to encourage effective and efficient use of application software to help the decision makers. There are three major changes to the second edition. First, several additional mini case studies are added. Second, the case studies are rearranged to allow a more systematic progress. Third, in addition to a solution, key detailed solutions to 35 exercises by using MS Excel are added.
