ADVANCED MICROECONOMIC THEORY (Coursepack), 2023

Lecture Notes in Microeconomic Theory Ariel Rubinstein, 2006-01-02 Lecture Notes in Microeconomic Theory is the first publication of Ariel Rubinstein's lecture notes from the first part of his well known course in microeconomic theory which he has taught for fifteen years to first year graduate students at Tel Aviv Princeton and New York universities The book will be an invaluable supplement to primary textbooks in microeconomic theory Conveying the style and method of Rubinstein's lectures it will benefit teachers and research economists as well as students The book focuses on and provides a critical assessment of models of rational economic agents and it contains a large number of original problems Rubinstein one of the world's most respected economics theorists has made substantial contributions to several fields in economics particularly game theory His work is characterized by an unusual combination of deep originality and surprising simplicity He is probably

best known for his contributions to the bargaining problem and more recently to bounded rationality **A Course in Microeconomic Theory** David M. Kreps,2020-06-23 David M Kreps has developed a text in microeconomics that is both challenging and user friendly The work is designed for the first year graduate microeconomic theory course and is accessible to advanced undergraduates as well Placing unusual emphasis on modern noncooperative game theory it provides the student and instructor with a unified treatment of modern microeconomic theory one that stresses the behavior of the individual actor consumer or firm in various institutional settings The author has taken special pains to explore the fundamental assumptions of the theories and techniques studied pointing out both strengths and weaknesses The book begins with an exposition of the standard models of choice and the market with extra attention paid to choice under uncertainty and dynamic choice General and partial equilibrium approaches are blended so that the student sees these approaches as points along a continuum The work then turns to more modern developments Readers are introduced to noncooperative game theory and shown how to model games and determine solution concepts Models with incomplete information the folk theorem and reputation and bilateral bargaining are covered in depth Information economics is explored next A closing discussion concerns firms as organizations and gives readers a taste of transaction cost economics
