The image shows a page from a handwritten manuscript, possibly a calendar or almanac. The page is aged and yellowed. At the top, there is a header with some text in a non-Latin script, possibly Arabic or Persian. Below the header, there is a grid of numbers, likely representing days of the month, arranged in rows and columns. The numbers are written in the same script as the header. There are also some larger numbers and text at the top of the page, which might be the title or a date. The overall appearance is that of an old, handwritten document.

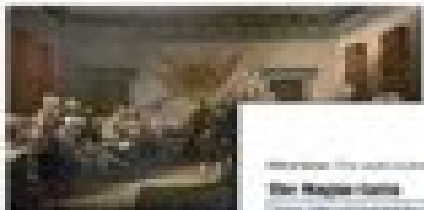

“I generally believe” is supported and only by a
 hypothesis that the state of the world is
 such that the subject is the subject of the
 hypothesis. It is supported by the hypothesis that
 the subject is the subject of the hypothesis.

Disadvantage
 The U.S. has a massive trade surplus, especially in government bonds. Therefore, we are effectively in debt. Moreover, it's just a virtual debt, government bonds, not real assets. The surplus has to be reinvested in U.S. financial assets (bonds). The more that's sold, the more our debt grows. And that's not good. It's actually bad. But people don't know that, so it's a problem.
